

How to update Rosetta certificates for SAML Authentication Profiles ?

- **Product:** Rosetta
 - **Product Version:** 7.1
 - **Relevant for Installation Type:** Local
-

Question

How to update Rosetta certificates for SAML Authentication Profiles ?
(Administration module → 'Authentication Profiles')

Answer

Starting SP 7.1, users can update Rosetta certificates for SAML using 'util sp' tool, as mentioned below.
The following procedure must be performed in each application server (SSH as 'dps' Unix user):

1. Run 'util sp' command → select option 7 (Deploy Certificate) → follow on-screen instructions.
 2. (Optional) Repeat step 1 to update any additional certificate/s.
 3. Restart Rosetta to apply changes.
