## Why doesn't DARA show in the Alma menu?

- **Product:** Alma
- 

### Question

The DARA (Data Analysis Recommendation Assistant) icon does not appear in the Alma menu. Why is DARA hidden and how can the icon be restored?

### Answer

The DARA icon will not appear in the Alma menu if there are not any recommendations relevant to the user's assigned role(s). When a relevant recommendation exists, the DARA icon will reappear in the menu the next time the user logs in.

### Additional Information

Find more information in the Online Help about [DARA Recommendations](#).
