

Setting Up OAI Integration Allowed IP Ranges

- **Product:** Alma
-

Question

How do I set up "Allowed IP" Range for OAI Integration to allow ALL IP addresses?

Answer

To open the IP range to all, set the IP range to be: 1.1.1.1-255.255.255.255 in the integration profile.

1. Go to Configuration Menu> General> External Systems> Integration Profiles> OAI_DEFINITION> Row Actions> Edit> Actions Tab> Allowed IPs
2. Enter IP description> IP Version> in IP Match Criteria field enter: 1.1.1.1-255.255.255.255
3. Save Profile

Please note that if no IP is defined in this mapping table, no one can access Alma via OAI requests.
