- NERS: Enhance broken link reports
- Create custom material types

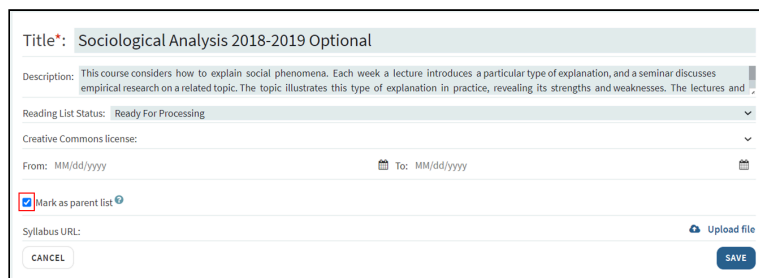

Main Features

Create Parent Reading Lists That Can Be Easily Discovered and Copied

December 2022 Leganto

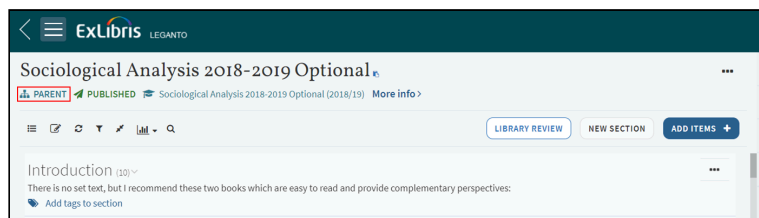

Parent lists can be used as templates for other lists and/or courses. List owners, Leganto course operators, and librarians can assemble lists of resources (such as for a specific course or a specific topic) and indicate that the list is a parent list. Other instructors can easily discover parent reading lists and can copy the full list, specific sections, or individual citations to their own reading lists.

When the parameter **mark_as_parent** ([Configuration Menu > Leganto > Features > Leganto Features](#)) is set to `true` (default), the edit list form in Leganto includes a checkbox to **Mark as parent list**.

Option to mark a reading list as a parent list

The parent list is marked with a **PARENT** indicator.

parent indication that a list is a parent list

When **parent reading list** ([Configuration > Leganto > Features > Find List Settings](#)) is **Enabled**, the **parent list** checkbox is available in the **Find Lists** search for librarians and instructors. As with other types of lists, instructors can only

discover and access parent lists that have been published to All Students or Anyone.

Find List parent list option

Librarians can mark a reading list as a parent list in Alma without needing to configure any parameters.

Option for a librarian to mark a list as a parent list

Note

If you rollover or duplicate a parent list, the parent tag is removed from the new list and the Mark as parent list checkbox is cleared.

Note

This feature will be available for analytics in the January release.

For more information, see [Creating a Parent Reading List](#).

NERS: Create Brand New Courses During Rollover

December 2022 Fulfillment - Course Reserves

NERS Enhancement (ID #8017)

Previously, when rolling over courses using the course loader integration profile, if the `OLD_COURSE_CODE` didn't exist in Alma, or couldn't otherwise be used for rollover, the course couldn't be rolled over and therefore the line was skipped. The new course defined in the line was not created. The **course loader** profile (**Configuration > General > External Systems > Integration Profiles**) **Actions** tab now includes an **On rollover create new course when old course doesn't exist** checkbox. When selected, in cases where the `OLD_COURSE_CODE` does not exist, the new course is still created.

New courses cannot be created for rollovers with an unusable `OLD_COURSE_CODE` that contains the plus sign (+) for mandatory fields (`COURSE_CODE`, `COURSE_TITLE`, and `PROC_DEPT`). An entry is added to the **Failed records** (**Configuration > General > External Systems > Integration Profiles > Course Loader > Job History > Error Reporting**) indicating that the course cannot be created because a mandatory field is missing.

For more information, see [Configuring Course Loading](#).

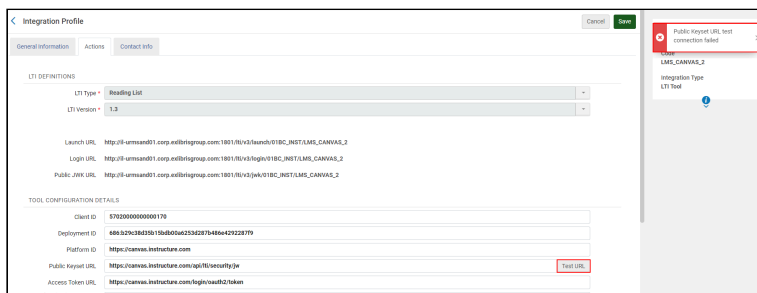

Test the LTI 1.3 Connection from Alma

December 2022 Leganto

When configuring LTI 1.3 (**Configuration > General > External Systems > Integration Profiles > LTI Tool**), a **Test URL** button is now available to test your connection for the URL in **Public Keyset URL** to help with troubleshooting. The **Test URL** indicates if the connection is successful or if the connection failed.

Test URL successful connection

Test URL failed connection

Support for Google Analytics 4

November 2022 Leganto

Leganto now supports Google Analytics 4 (GA4). We strongly recommend upgrading to GA4. For instructions on how to upgrade, see [Analytics Help](#).

After upgrading, copy your G4A Measurement ID and store it in **google_ga4_id** (**Configuration Menu > Leganto > General > External Integrations**). All configured accounts receive data. Once your new account is working, you can remove the old ID from **google_analytic_id** (**Configuration Menu > Leganto > General > External Integrations**).

Analytics Accounts	Properties & Apps	Views

Leganto production 721	Leganto none production - GA4 317	
Leganto QA 721		

GA4

For more information, see [Enabling Google Analytics](#).

Rialto Order Updates in Reading List Citation Alerts

November 2022 Leganto

Reading and citation list users are now able to monitor the progress of a Rialto order created from a reading list when viewing that reading list or citation. Rialto linked orders are now updated on the citation as follows:

- **Rialto Order Placed** (when the order has been submitted)
- **Rialto Order Complete** (when the item has been received or activated)
- **Rialto Order Rejected** (when cart item was rejected from orders awaiting approval)
- **Rialto Order Cancelled** (when the order is cancelled)

For more information, see [Searching Reading and Citation Lists](#).

Searching and Purchasing from Citations and Reading Lists

September 2022 Leganto

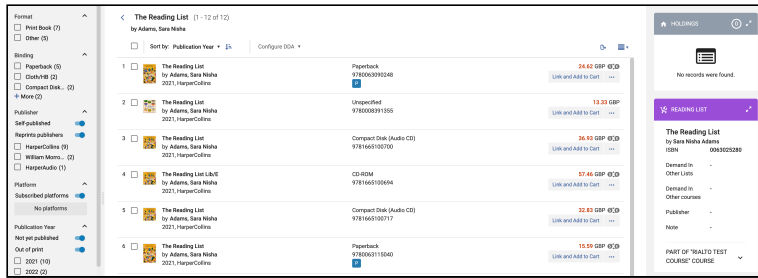

Idea Exchange

Users with access to modify reading and citation lists in Alma course reserves now have the option to search the marketplace directly from the lists, and place an order, without having to break their workflow. Similar to searching from a purchase request, a new **Search in market** button appears for each request on a list.

<input type="checkbox"/> The Reading List Book By Sara Nisha Adams ISBN: 0050252380 Linked to market offering	Request Status: Being Prepared Resource Locate Status: No Resources Located Copyright Status: Not Determined	Course Name: Rialto test course Course Code: RIALTO_TEST Reading List: Rialto test list Created By: Staff, Ex Libris 29/09/2022 03:22:27 BST Modified By: Staff, Ex Libris 29/09/2022 03:24:10 BST	Edit Search in market
--	--	--	-----------------------

Search the market option

When the button is selected, the catalog of available titles in the Rialto marketplace are searched using the information provided (title, author, and/or ISBN). On page load, when the title is available, the user is presented with the available offers. To aid in selection, the course information is present, as well as the holdings panel that display any local or network zone holding matches.

Search a Reading List

When the desired offer is identified, selecting **Link and Add to Cart** ensures the record is linked when purchased. The item is added to the user's cart, and a badge appears on this offer throughout the marketplace so that other users are aware it is being worked on by another staff member.

A badge indicating that the offer is being worked on

Users can now continue to checkout or use the back arrow within the page heading to return to their list and continue to add to the cart.

Simplify the Data Managed in Alma Using Course Archiving

September 2022 Fulfillment - Course Reserves

You can now archive courses in Alma, enabling your library to reduce the amount of data you view in Alma without deleting historical information. Archived courses are still available for reference purposes, and you can view statistical data on archived courses via Alma Analytics. Courses can be archived and unarchived individually or in bulk.

Note

The indication for archived/unarchived courses will be available in Alma Analytics in November.

An **Archive** action is now included in the course action list to easily archive a single course. Marking a course as archived immediately filters the course from the current course list visibility, removing it from view.

Code	Section	Name	Academic Department	Processing Department	Instructor	Status	Start Date	End Date	Term	
1 067-2022	-	English 1		Main Library	-	Inactive	05/09/...	14/11/...	-	...
2 068-2022	-	Biology 101		Main Library	-	Inactive	05/09/...			Edit
3 08-2022_Bolk	-	Sociology	Social Sciences	Main Library	-	Inactive	05/09/...			Reading List Copy Reading List
4 444	-	Art History	History	History	Multiple	Inactive	08/06/...			Duplicate
5 555	-	American History	History	History	Multiple	Active	09/02/...			Leganto create list - reminder email Delete
6 882022	-	Anthropology	Social Sciences	Main Library	-	Inactive	05/09/...			Archive View hidden
7 8945	-	Theater History	History	History	Multiple	Active	21/03/...			View hidden

Archive action

When marking a course as archived, any reading list associated with the course is also archived. Therefore, a confirmation message appears confirming that all reading lists associated with the course are archived as well.

Confirmation Message

Reading lists that are associated with this course will also be archived. Are you sure you want to archive English 1 and all its reading lists?

Cancel Confirm

Confirmation Message explaining that all lists will be archived

Note

Courses where the reading list is linked to additional unarchived courses cannot be archived. If you attempt to archive a course with a reading list that is linked to additional courses, you receive an error message:

This course cannot be archived because it has [number] unarchived reading lists that are linked to other courses. You should either archive the reading lists or remove the course association, then try again.

When viewing an **Archived** course, you can use the **Unarchive** action to unarchive the course. The course is then restored, but the associated reading lists remain archived, and you need to unarchive them separately.

The screenshot shows a table of courses with columns: Code, Section, Name, Academic Department, Processing Department, Instructor, Status, Start Date, End Date, and Term. The first row is 'English 1' with status 'Inactive'. A dropdown menu is open for the first row, showing actions: Edit, Reading List, Copy Reading List, Duplicate, Leganto create list - reminder email, Delete, Unarchive (highlighted with a red box), and View hidden.

Unarchive action appears for archived courses

You can also archive/unarchive courses in bulk using the **Course Bulk Update** job ([Admin > Manage Jobs and Sets > Run a Job](#)). When selecting the **Set course visibility** checkbox, you can select **Archived/Unarchived** from the adjacent dropdown list to archive/unarchive courses in bulk. By default, no option is selected.

Courses that are archived/unarchived successfully are counted in the **Total records processed** and **Total records updated**.

When courses fail to archive/unarchive, the job completes with a warning. You can select the warning to view which courses were not archived/unarchived and why.

Description	Count	
1 Course updated	1	...
2 Course deleted	0	...
3 Failed to update course dates	0	...
4 Create list - reminder email failed	0	...
5 Failed to remove list association	0	...
6 Failed to archive course	0	...
7 Job failed on course	0	...

Completed successfully

Description	Count	
1 Course updated	0	...
2 Course deleted	0	...
3 Failed to update course dates	0	...
4 Create list - reminder email failed	0	...
5 Failed to remove list association	0	...
6 Failed to archive course	1	...
7 Job failed on course	0	...

Completed with warnings

Alma now includes a new **Visibility** facet, for **Archived** and **Unarchived** courses so that you can filter your course list according to current or archived courses. By default, the course list is filtered to **Unarchived** courses and the facet is hidden from the left panel.

Courses (1 - 20 of 38)

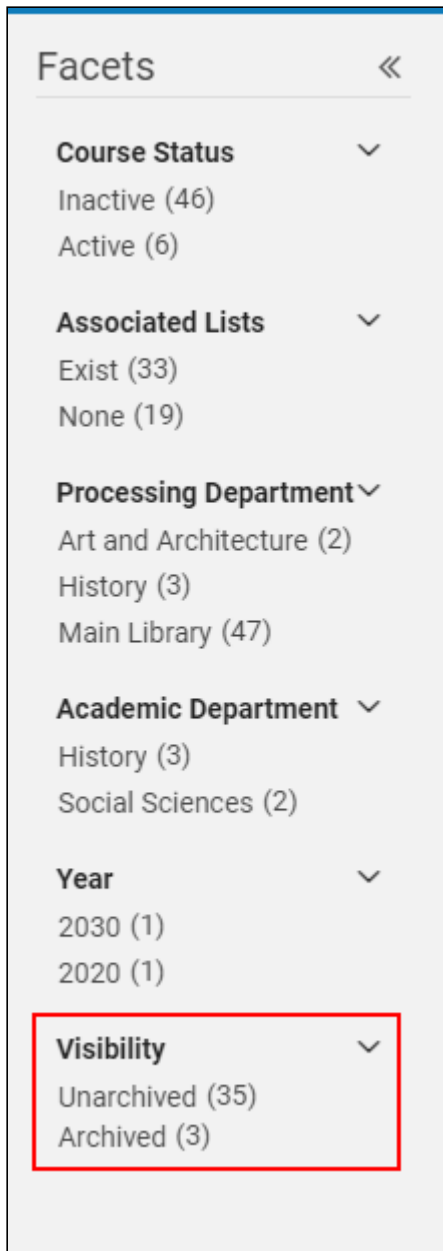

GuideMe Add Course

Visibility **Unarchived**

Code	Section	Name	Academic Department	Processing Department	Instructor	Status	Start Date	End Date	Term
067-2022	-	English 1		Main Library	-	Inactive	05/09/...	14/11/...	-

555	-	American History	History	History	Multiple	Active	09/02/...	10/02/...	-

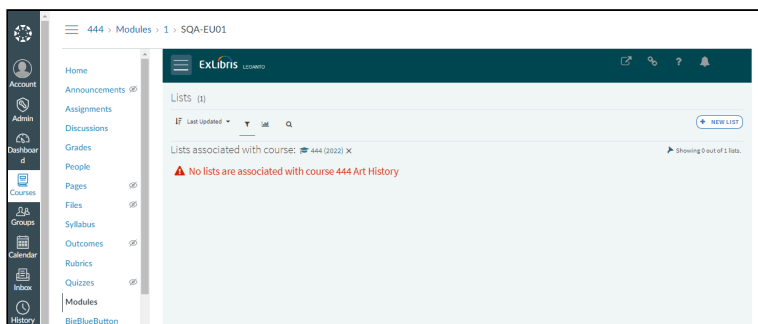

Course List Visibility filtered to Unarchived by default

The default **Visibility** filter can be removed which displays all courses and displays the **Visibility** facet with the option to filter to either **Archived** or **Unarchived** courses.

Archived/Unarchived Facets

Archived courses are hidden from view in Leganto. When attempting to access an archived course from the Learning Management System (LMS), you receive a message that no lists are associated with the course.

LMS message when accessing archived lists

Archived courses are not included in the **Manage course association** and **Roll Over** lists in Leganto.

Manage course association

No course is associated to this list.

For more information, see [Archiving Reading Lists](#).

Automatically Complete Citations with an Unlimited Number of Licenses

August 2022 Leganto

To streamline library processing work, libraries can now choose to have citations automatically set to **Complete** when the associated electronic portfolio is available to an unlimited number of concurrent users. This option is disabled by default. To enable it, set the **unlimited_access_citation** parameter to define the desired citation status (BeingPrepared, Complete, Declined, Inactive, InProcess, ReadyForProcessing, or a code from the **Additional Reading List Citation Statuses** code table.

If desired, you can use the **unlimited_access_model_code** ([Configuration > Leganto > List Management > Course Reserves Automatic Status](#)) parameter to customize the list of Unlimited Access Model Codes ([Configuration > Acquisitions > Acquisitions Infrastructure > Licenses > Access Model](#)) that triggers the citation status change. The default values are **PUR-UU, UA, U-UA**, which all have the public access model **Please note that the platform supports unlimited access**.

Once configured, each portfolio with a link in the **Acquisition** tab > **Public access model** field (see screenshot below) is checked against the **unlimited_access_model_code** parameter. If at least one of the codes matches, the citation status automatically receives the status defined in the **unlimited_access_citation** parameter. If the **Public access model** field is left empty, no changes occur.

The screenshot shows the 'Electronic Portfolio Editor' interface. The 'Acquisition' tab is selected and highlighted with a red box. Within this tab, the 'Public access model' field is also highlighted with a red box and contains the text 'Please note that the platform supports unlimited access (U-UA)'. Other fields like 'PO Line', 'License', and 'PDA' are visible but not highlighted.

Public access model field on the Acquisition tab of the Electronic Portfolio record

For more information, see [Configuring Defaults Statuses for Citations/Reading Lists](#).

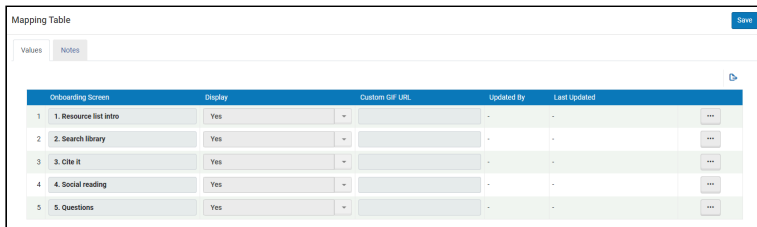

Enable and Disable Specific Screens in the Instructor's Onboarding Wizard

August 2022 Leganto

You can now configure which onboarding wizard screens to show/hide to instructors, by setting the **Display** option in the

[Configuration > Leganto > UI > Onboarding](#) to **Yes/No**. The default **Display** setting for each screen is **Yes**.

You also have the option to add a **Custom GIF URL** to present your own GIF for each screen. By default, the out-of-the-box GIF appears.

Onboarding Screen	Display	Custom GIF URL	Updated By	Last Updated
1. Resource list intro	Yes	-	-	-
2. Search library	Yes	-	-	-
3. Cite it	Yes	-	-	-
4. Social reading	Yes	-	-	-
5. Questions	Yes	-	-	-

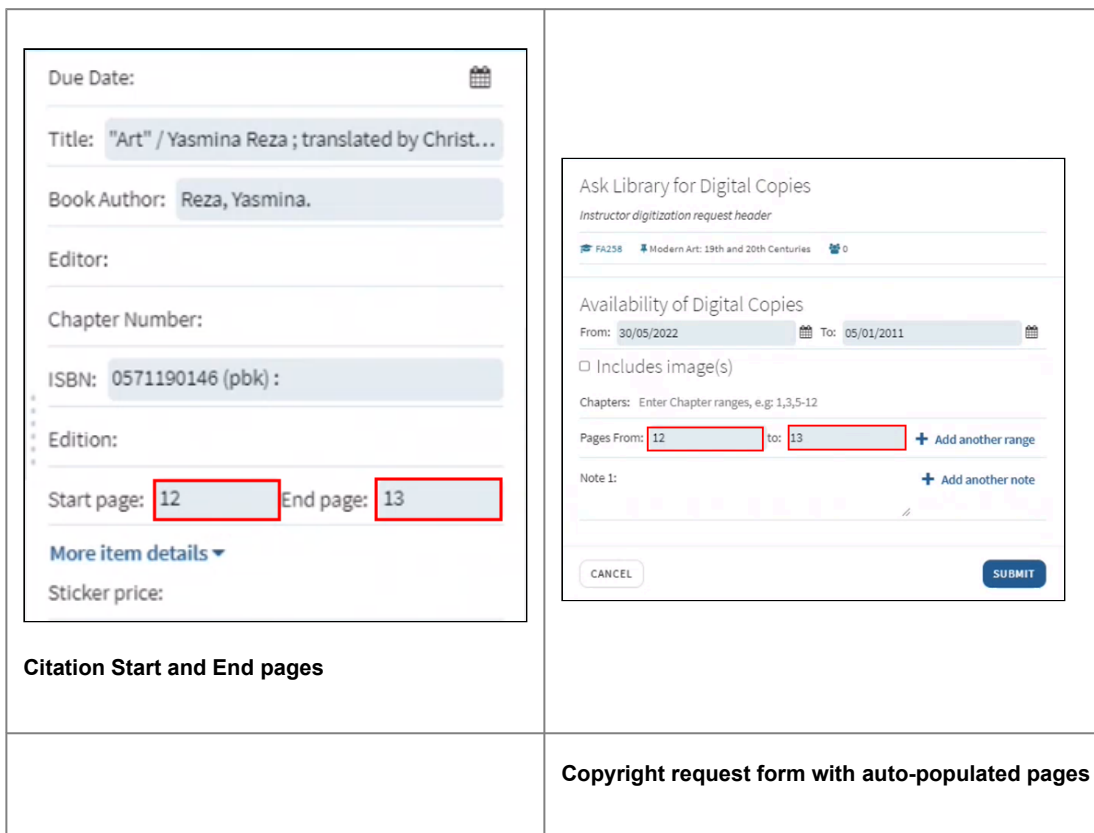

Onboarding Screen configuration

For more information, see [Enabling or Disabling the Welcome Screen](#).

Auto-Populate Page Ranges for Copyright Request

July 2022 Leganto

The **Pages From** and **to** fields on all copyright forms now auto-populate when the **Start page** and **End page** fields are included on the citation.

<p>Due Date:</p> <p>Title: "Art" / Yasmina Reza ; translated by Christ...</p> <p>Book Author: Reza, Yasmina.</p> <p>Editor:</p> <p>Chapter Number:</p> <p>ISBN: 0571190146 (pbk) :</p> <p>Edition:</p> <p>Start page: 12 End page: 13</p> <p>More item details ▾</p> <p>Sticker price:</p>	<p>Ask Library for Digital Copies</p> <p><i>Instructor digitization request header</i></p> <p>FA258 Modern Art: 19th and 20th Centuries 0</p> <p>Availability of Digital Copies</p> <p>From: 30/05/2022 To: 05/01/2011</p> <p><input type="checkbox"/> Includes image(s)</p> <p>Chapters: Enter Chapter ranges, e.g. 1,3,5-12</p> <p>Pages From: 12 to: 13 + Add another range</p> <p>Note 1: + Add another note</p> <p>CANCEL SUBMIT</p>
Citation Start and End pages	Copyright request form with auto-populated pages

In addition, when the **Start page 2** and **End page 2** fields on the citation contain values, selecting **Add another range** on the copyright request form also auto-populates the second page range field. Auto-populated pages can be manually overwritten.

Use "Demand in Other Lists" to Support Purchasing Decisions

July 2022 Fulfillment - Course Reserves

For purchase requests created from a citation, the **Course Information** section of the purchase request now includes a **Demand in other lists, other courses** link. Selecting the link opens the **Manage Resource Options** window, enabling you to easily view information (such as course, number of participants, tags, etc.) about this citation in other lists and courses.

Code	Section	Name	Processing Department	Academic Department	Number Of Participants	Instructor	Term
1 CH118	01	Principles of Modern Chemistry II	O'Neill Library Course Reserves	Chemistry	0	Scott, Lawrence	Spring

Demand in other lists, other courses link in a purchase request

For more information, see [Managing Purchase Requests Created from Citations](#).

View Reading List Tags in the Demand in Other Lists Table

July 2022 Fulfillment - Course Reserves

When reviewing and processing citations, library staff can view "Demand in other lists". And use it to understand which other reading lists or courses utilize the same resource. The **Demand in other lists, other courses** table now includes a new **Citation Tags** column. This column enables library staff to easily determine which citation tags are associated with the citation in other lists. For citations with multiple tags, the tags are listed separated by a semicolon (;). The column is hidden by default.

Course Code	Course Name	Section Id	Academic Department	Processing Department	Instructor	Start Date	End Date	Number Of Participants	Reading List Name	Reading List Status	Section Name	Citation Tags	Citation Status
1 83608	83608	-	Main Library	-	-	22/0..	22/0..	20	Assignment	Being Prepared	Resources	-	Being Prepared
555	555	-	History	History	Multiple	09/0..	10/0..	15	ChangeLis..	Being Prepared	Resources	Mandatory Reading	Being Prepared

Citation Tags column

Disable File Upload for Broken Link Reporting

June 2022 Leganto

Leganto now includes the parameter **mark_as_broken_file_upload** (**Configuration > Leganto > General > Settings**) which enables uploading a file to the broken link report. Previously, the upload file option was tied to the option to upload a file to a citation. Now you can configure file upload for broken link reporting without impacting the ability to upload a file to a citation. When set to `true`, the option to upload a file when marking a link as broken is visible to both students

and instructors in the mark as broken dialog box. When set to `false`, this option is hidden. The default for this parameter is `true`.

Note

The maximum file size allowed is 50 MB.

Are you sure you want to report a problem with the file?

Your user information will be sent to the library for troubleshooting purposes.

Add a comment:

Upload a file when reporting a broken link

For more information, see [Enabling Broken Link Reporting](#).

Automatically Assign Reading Lists

June 2022 Fulfillment - Course Reserves

To automate the process of assigning reading lists to library staff for processing, we added the parameter `auto_select_list_assignee` ([Configuration > Fulfillment > General > Other Settings](#)). When a reading list is associated with a course and `auto_select_list_assignee` is set to `true`, the list is automatically assigned to a processing department operator ([Configuration > Fulfillment > Courses > Processing Department > Operators tab](#)) from the course's processing department at random. When set to `false`, the **Assignee** can only be set manually. The default setting for this parameter is `false`.

Odsid	Name	Status	Assignee	Due Back Date	Alerts
0.605727247745190	Medicine in Ancient Times	Being Prepared	-	31/12/2016	
0.4443919792238564	Introduction to Health & Human Services	Being Prepared	-	13/05/2021	✓
0.27827926340899267(1)	Animal Population(1)	Being Prepared	-	-	

Reading List Assignee

Name
Abaci, Letina
Baccon, Louanne
Abse, Luther

Course Operators

If the **Operators** list for a processing department is blank, the list will not be automatically assigned.

When multiple courses are associated with a list, the **Assignee** is selected from the processing department of the first course that was associated with the list.

For imported reading lists, if the import file includes an **Assignee**, the **Assignee** is assigned to the reading list. If the file **Assignee** is blank, the list is assigned to an operator from the processing department at random.

For rolled over reading lists, if the rollover job is configured to copy the **Assignee**, the **Assignee** is assigned to the list. If the **Assignee** is blank, or the rollover job is not configured to copy the **Assignee**, the list is assigned to an operator from the processing department.

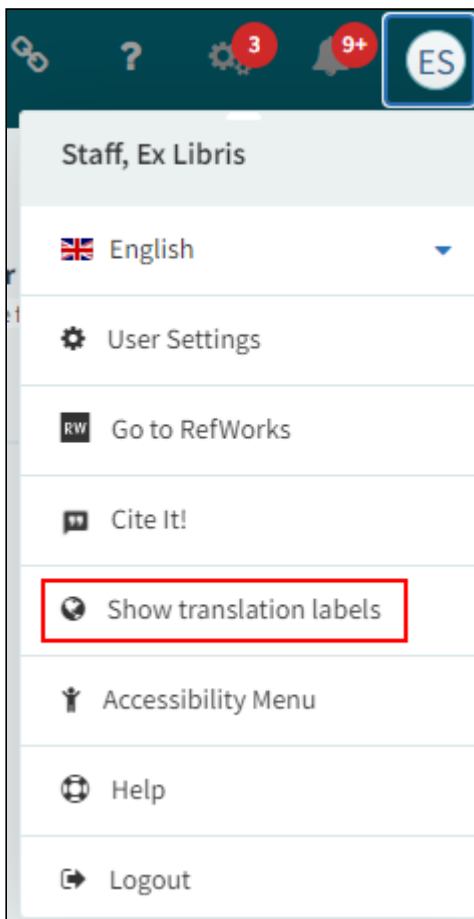

If a course is deleted or unassociated with a list, the current **Assignee** remains assigned to the reading list.

For more information, see [Assigning a Reading List Automatically](#).

Option to View Label Codes in Leganto

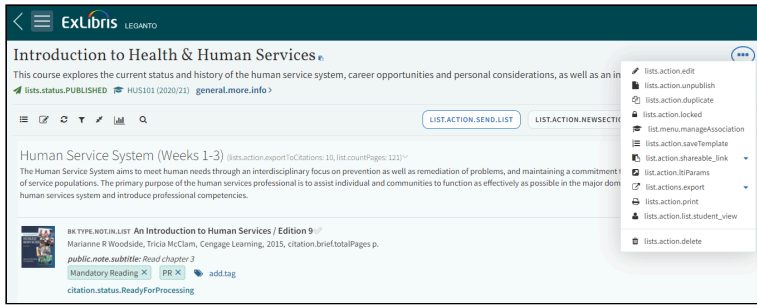

April 2022 Leganto

To enable easier customization and translation of labels (**Leganto Configuration > General > Customer Labels**), administrators now have the option to display all translation labels by selecting **Show translation labels** from the user menu.

Show/Hide translation labels options

When enabled, Leganto displays the names of the Alma translation labels.

The Leganto interface labels codes

NERS: Enhanced Broken Link Reports - Part 2

March 2022 Leganto

NERS Enhancement (ID #7208)

Users have the option to upload a file when reporting a broken link.

Are you sure you want to mark this link as broken?

Your user information will be sent to the library as having marked the link as broken.

Add a comment:

Citation Has Assignment Field Added to Leganto Analytics

March 2022 Analytics

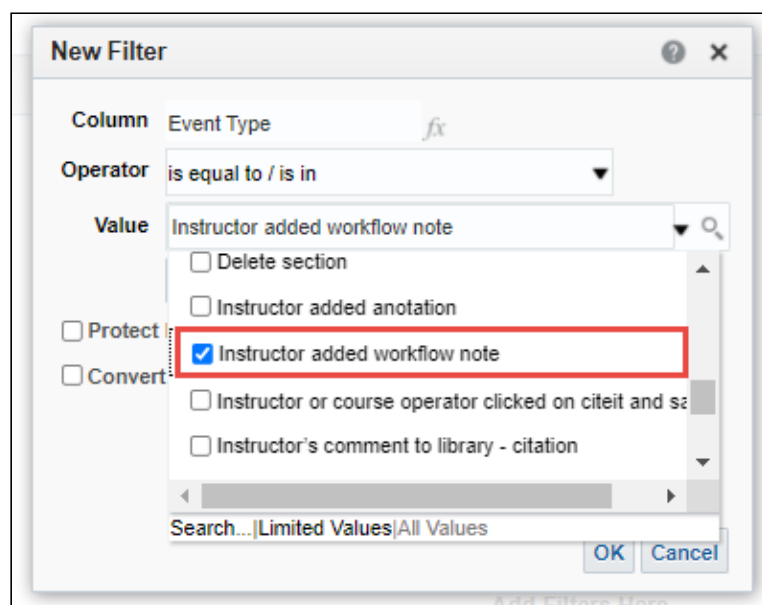

The **Citation Has Assignment** field was added to the Citations dimension of the Course Reserves, Leganto Student Usage, and Leganto Instructor Usage Events subject areas. It indicates if the citation is linked to an assignment.

Leganto Citation Workflow Note Field Enhancements

March 2022 Analytics

The **Leganto Citation Workflow Note** field (Course Reserves > Reading List Citation) was renamed to **Leganto Citation Workflow Note (Q&A)** to clarify that the Workflow Note is added as a result of the Leganto Questions feature.

In addition, the event is now reportable when the note is added. To support this feature, the new **Instructor added workflow note** event type was added as a possible value to the Event Type field (Leganto Instructor Usage Events > Instructor Usage Events).

The screenshot shows a 'New Filter' dialog box. The 'Column' is 'Event Type'. The 'Operator' is 'is equal to / is in'. The 'Value' dropdown is open, showing a list of event types. The 'Instructor added workflow note' option is selected and highlighted with a red box. Other options include 'Delete section', 'Instructor added anotation', 'Instructor or course operator clicked on citeit and se', and 'Instructor's comment to library - citation'. There are 'Protect' and 'Convert' checkboxes, a search bar, and 'OK' and 'Cancel' buttons.

Instructor added workflow note

NERS: Enhanced Broken Link Reports - Part 1

February 2022 Leganto

NERS Enhancement (ID #7208)

When marking a link as broken, users now have the option to add a comment to provide more information about the link.

Leganto now includes the parameter **mark_as_broken_comment_mandatory** (**Configuration > Leganto > Features > Leganto Features**) to require users to include a comment when reporting a broken link. When set to true, users must enter a comment when reporting a broken link. When set to false, comments are optional. The default for the parameter is false.

Are you sure you want to report a problem with the file?

Your user information will be sent to the library for troubleshooting purposes.

Add a comment*:

Add a comment

The **Reporter** column lists how many users reported the broken link.

Remove Assignments and Scores after a Designated Period

February 2022 Leganto

To clean up old course assignments and grades and enable institutions to comply with institutional privacy policies, we have added a new job under **Activate/Deactivate Courses (Configuration > Fulfillment > General > Fulfillment Jobs Configuration)**. The new job enables you to configure when to **Remove assignment submissions**. The default value is **365 days after a course end date**. If the field is set to 0, the submissions and scores are removed when the course ends. If this field is left blank, the submissions and scores are not removed.

Remove assignment submissions configuration

The Job Report includes the **Total submissions deleted**.

The Job Events includes the **Deleted Submissions**. When selecting **Deleted Submissions**, the following information appears:

Course Code | Course Section | Reading list Name | Number of deleted submissions

For more information, see [Working with Assignments](#).

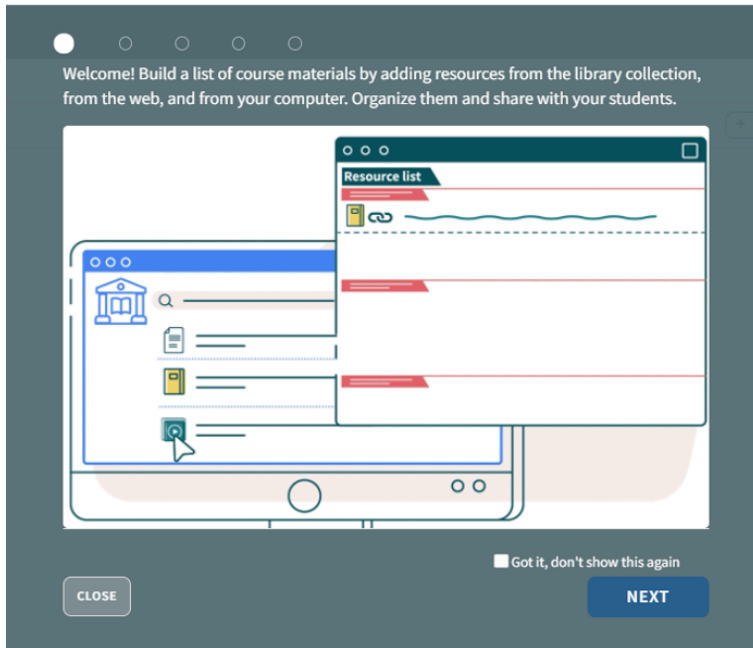

New Onboarding Experience

January 2022 Leganto

Leganto now offers a new series of onboarding screens for instructors, displayed when Instructors log in for the first time. The onboarding screens include GIFs that portray the general concepts underlying Leganto and how it can be used, then point instructors to where they can go for more information when they need it. There is minimal text per screen, which can

be customized. The new screens explain the following:

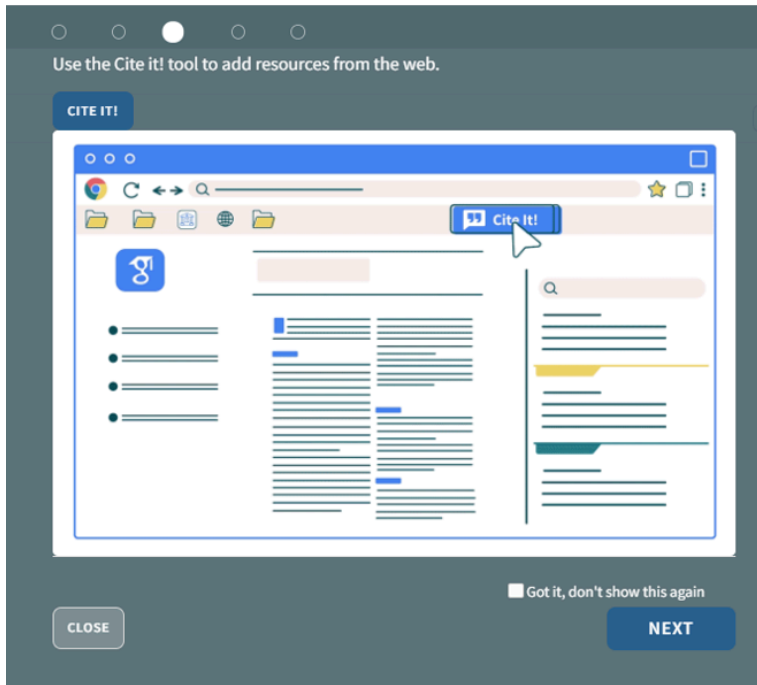

- Leganto is a tool that can be used to gather resources from different sources and organize them
- Resources can be added from the entire library collection
- Resources can be added from the web, using CiteIt!
- Social Reading
- Where to go when you need help
- Installing CiteIt!

Sample Welcome GIF

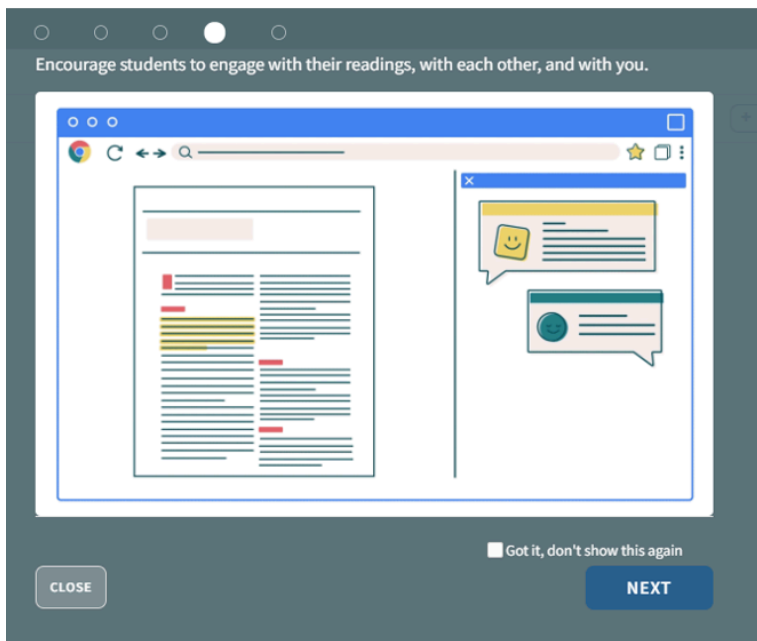

Sample Add Resources GIF

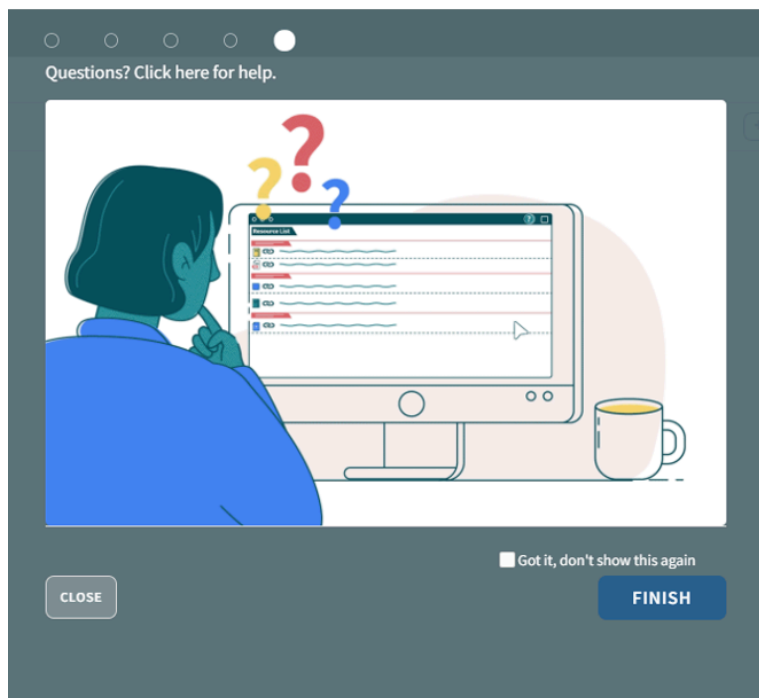

/p>

Sample Add Citelt GIF

Sample Social Reading GIF

Sample Help GIF

The new onboarding screen is enabled by default (parameter: **welcome_screen_instructors** in [Configuration > Leganto > Features > Leganto Features](#)).

Note

The welcome screen is disabled for instructors who have already seen and used Leganto before.

The option to display **Help** (parameter **welcome_screen_help** [Configuration > Leganto > Features > Leganto Features](#)) for students when they first log in remains unchanged.

For more information, see [Configuring Leganto UI Elements](#).

Watch the [New Leganto onboarding for instructors](#) video (1:22 minutes).

Set Section View for a Reading List

January 2022 Leganto

NERS Enhancement (ID #7189)

Currently, institutions can use the parameter **sections_collapsed** ([Configuration > Leganto > UI > Settings](#)) to set the default for how a list appears (collapsed or expanded). To enable instructors to override this default and set their own default view, set the parameter **set_section_view** ([Configuration > Leganto > UI > List Menu](#)) to **Yes**. By default, the setting is **No**. When enabled, instructors can use the action **Set Section Collapsed/Expanded** to override the institution's default setting.

<ul style="list-style-type: none"> Edit Unpublish Order Citations in All Sections ▾ Duplicate list Roll Over list Lock Manage course association Save list structure as a template Configure list discussions ▾ Create a shareable link ▾ LTI Direct Access Export ▾ Print View list as a student Display recent list changes Set Section Collapsed <div style="border: 1px solid #ccc; padding: 5px; text-align: center;"> Delete </div>	<ul style="list-style-type: none"> Edit Unpublish Order Citations in All Sections ▾ Duplicate list Roll Over list Lock Manage course association Save list structure as a template Configure list discussions ▾ Create a shareable link ▾ LTI Direct Access Export ▾ Print View list as a student Display recent list changes Set Section Expanded <div style="border: 1px solid #ccc; padding: 5px; text-align: center;"> Delete </div>
Instructor default action - Collapsed	Instructor default action - Expanded

For more information, see [Collapsing \(Hiding\) or Expanding a Section](#).

Watch the [Select section view for a Leganto reading list](#) video (1:27 minutes).

Copyright Percentage Field Easily Assists in Copyright Evaluation

November 2022 Fulfillment - Course Reserves

To assist librarians in evaluating copyright, the **Edit > Copyright Attributes** tab now includes a field for **Copyright percentage**. This field auto-populates when the **Required Pages** and **Resource Total Pages** contain values. The Copyright percentage field enables librarians to clearly determine the percentage of pages requested for a resource.

The screenshot shows the 'Edit Reading List Citation' form with the 'Copyright Attributes' tab selected. The form contains the following fields and values:

- Copyright Status: Waiting for Approval
- Copyright Auditing Required:
- Volume: 74
- Issue: [empty]
- Number of Copies for Students: [empty]
- Resource Total Pages: 900
- Total Chapters Count: [empty]
- Required Pages: From 110 To 139
- Total Required Pages: 30
- Copyright percentage: 10.00

Copyrights Attributes tab includes copyright percentage field

Update the Course Year in Bulk

May 2022 Fulfillment - Course Reserves

Idea Exchange

The **Course Bulk Update** job ([Admin > Manage Jobs and Sets > Run a Job](#)) now includes a **Year** field so you can update the course year for a set of courses in bulk. When the **Year** checkbox is selected and the field contains a value, you can define the conditions for update:

- **If field empty** – Only update courses without a **Year**.
- **If field not empty** – Only update courses that currently contain a **Year**.
- **Unconditionally** – Update all courses without exception.

If the checkbox is selected and the **Year** is left blank, the year is removed from all courses in the set.

The screenshot shows a configuration form for a bulk update job. It includes fields for 'Start date' and 'End date', a 'Submit list by' field, and a 'Year' field. The 'Year' field is highlighted with a red box, and a dropdown menu is open below it, showing three options: 'If field empty', 'If field not empty', and 'Unconditionally'. The 'Unconditionally' option is selected. There are also checkboxes for 'Remove list association' and 'Leganto create list - reminder'.

Year configuration - Course Bulk Update

For more information, see [Course Bulk Update](#).

Create Custom Material Types

February 2022 Fulfillment - Course Reserves SF: 05318298

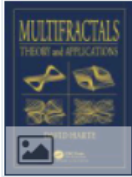

Customers can now add their own citation material types to Leganto ([Configuration > Fulfillment > Courses > Citation Material Type](#)). The new types are displayed as part of the **Type** drop-down menu. In the **Type** drop-down menu, the new material types are presented under the **Others** sub-category and are ordered alphabetically.

Note

Existing types cannot be removed, only customized.

If no thumbnail is configured ([Configuration > Leganto > UI > Citation default thumbnails](#)) for a type, the default thumbnail is used.

If a new material type is added to Leganto, but not mapped in the field mapping or brief format, it is mapped as a book.

See [Citation Default Thumbnails](#), [Citation Field Mapping](#), and [Citation Brief Mapping](#) for more information.

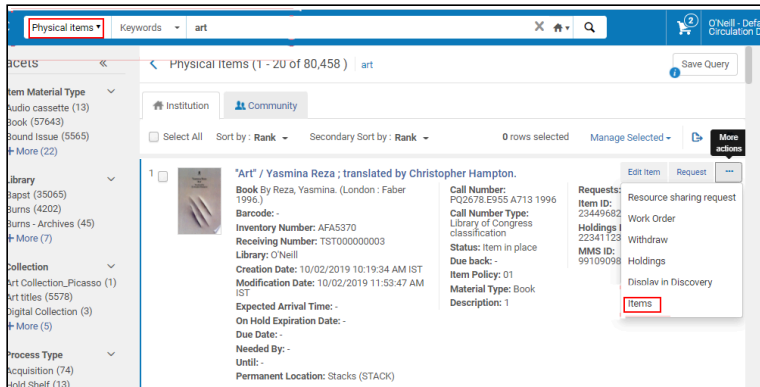

Alert of Associated Reading List when Withdrawing or Deleting Items

January 2022 Fulfillment - Course Reserves

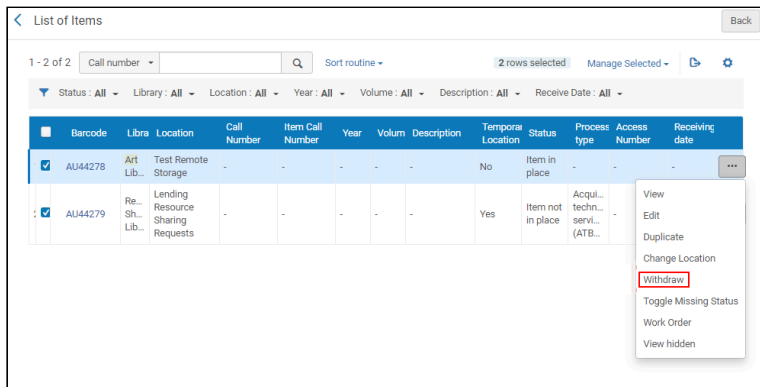

NERS Enhancement (ID #7207)

When using the **Withdraw Items** action to remove a physical item from a repository, Alma now checks whether this item is used as course material.

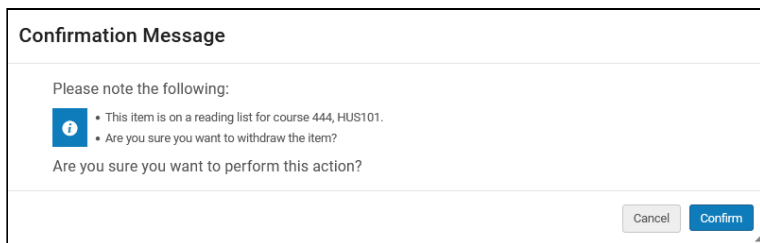

Physical Items - Items

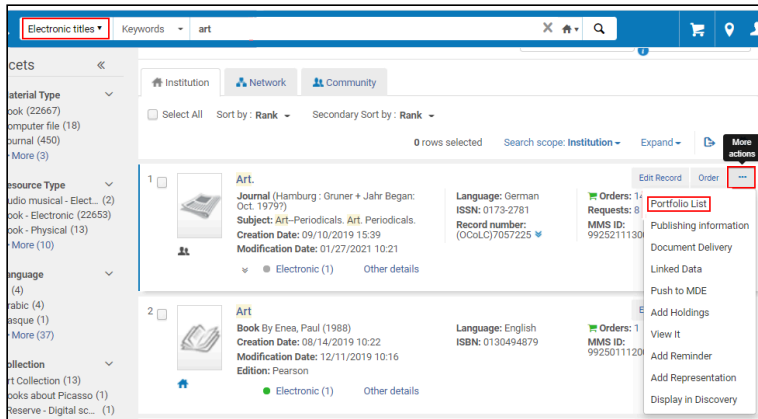

Withdraw

If so, the warning message now includes a notice that the item is on one or more reading lists. The message also includes the courses that are associated with the list or lists.

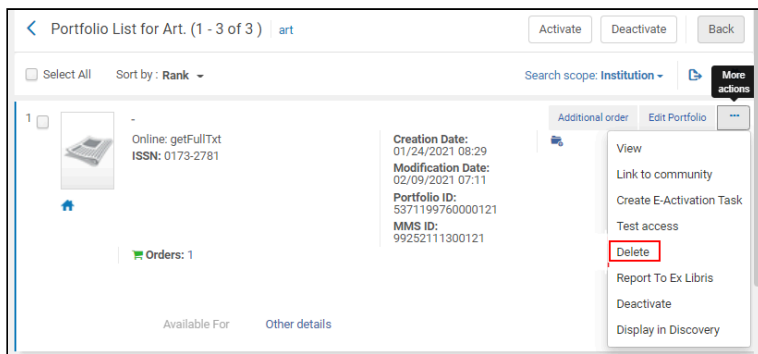

Confirmation Message for removing physical items

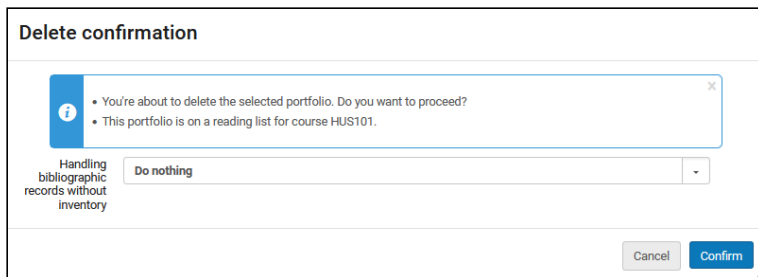

Similarly, for electronic items, when using the action **Portfolio List to Delete** a portfolio, the warning message now includes a notice that one or more items from this portfolio are on at least one reading list and which courses the reading lists are associated with.

Electronic titles - Portfolio List

Delete

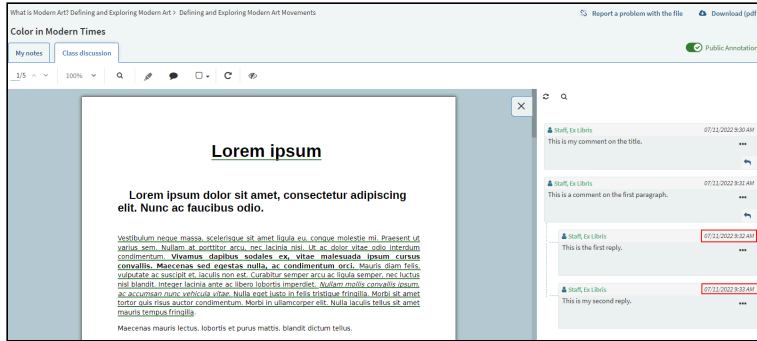

Confirmation Message for removing electronic items

Additional Enhancements

- December 2022 Leganto**

To improve usability, annotation replies now display in the order in which they were posted, listing the most recent reply last.

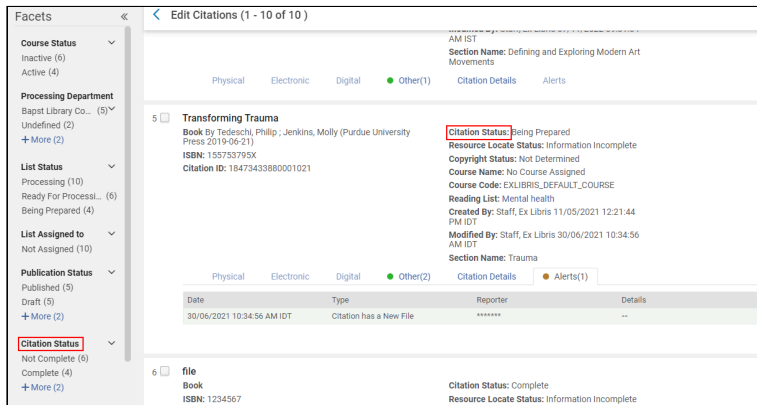

Annotation replies display in the order posted

- **December 2022 Fulfillment - Course Reserves**

When copying a citation, the **Created by** on the new citation is attributed to the user who copied the citation.

- **December 2022 Fulfillment - Course Reserves**

For consistency and clarity, the Brief Display **Request Status** label is now labeled **Citation Status** to match the **Citation Status** facet label and the data in analytics.

Brief Display Citation Status

- **December 2022 Fulfillment - Course Reserves**

The **List Last Set to Complete Date** field was added to the Reading Lists dimension in the Leganto Student Usage, Leganto Instructor Usage Events, and Course Reserves subject areas. It displays the most recent date that the reading list was set to **complete**.

- **December 2022 Fulfillment - Course Reserves SF: 06454739**

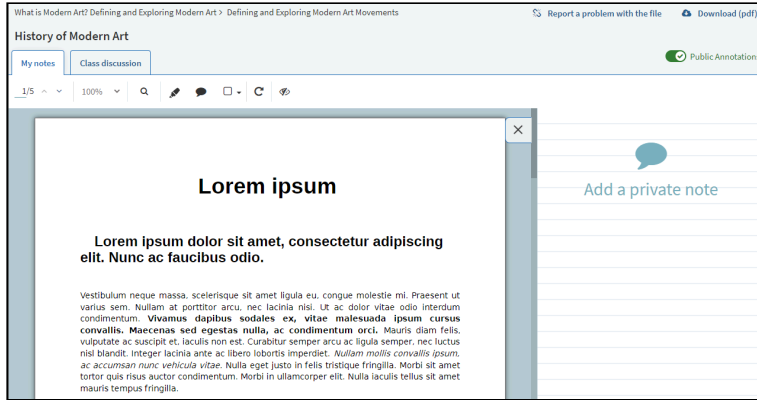

The **Citation Hidden Links** field was added to the Citations dimension of the Leganto Student Usage and Leganto Instructor Usage Events subject areas and the Reading List Citations dimension of the Course Reserves and Purchase Requests subject areas. It indicates if there are hidden links in the citation.

- **December 2022 Leganto**

The Maori language can now be excluded from the Leganto interface by adding `mi` to the **exclude_language_codes** (**Configuration > Leganto > General > Settings**) parameter value.

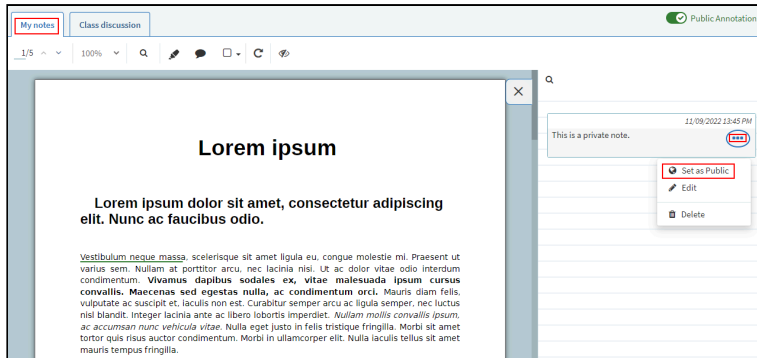

- **November 2022 Leganto**

To improve usability, Leganto now displays public and private annotations in separate tabs.

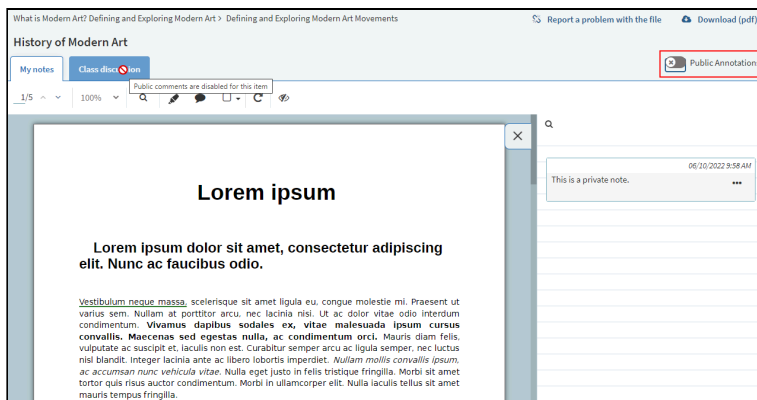

Private annotation tab

Users can view and add private annotations using the **My notes** tab, and the annotations do not specify which user posted the annotation. When **Public Annotations** are enabled, private annotations can be **Set as Public**, which moves the annotation from the **My notes** tab to the Class discussion tab.

Private annotations options

Users can view and add public annotations using the **Class discussion** tab, and the annotations specify which user posted the annotation. Public annotations can be **Set as Private** which moves the annotation from the **Class discussion** tab to the **My notes** tab. When **Public Annotations** are disabled, the **Class discussion** tab is disabled.

Disabled public annotations

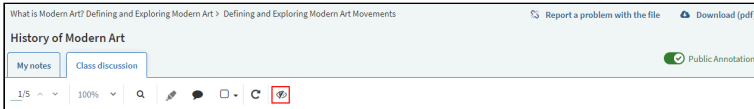

Note

Highlighting is disabled on the **Class discussion** tab.

Additionally, the Show/Hide annotations icon

is now inline with the other menu items rather than right-aligned.

The Show/Hide annotations icon

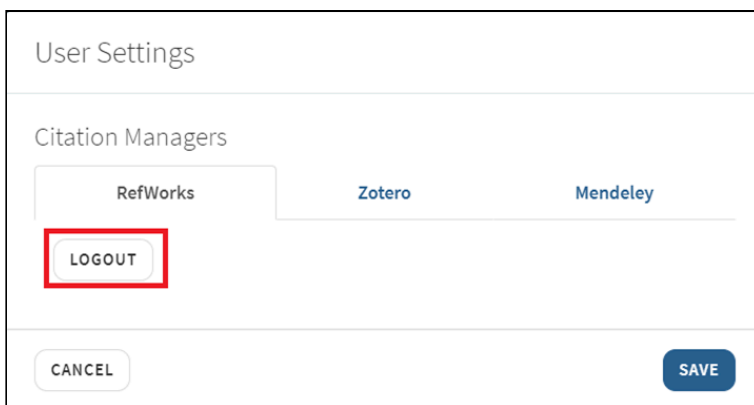

For more information, see [Configuring Leganto UI Elements](#).

- **November 2022 Leganto**

It is now possible to copy citations from a locked list by selecting the action **Copy citation** from a citation.

- **November 2022 Leganto**

The default label for code `user.settings.citation.mngmt.refworks.remove` ([Configuration Menu > Leganto > General > Labels](#)) was changed from **Delete Refworks key** to **LOGOUT**.

The RefWorks LOGOUT option

- **September 2022 Leganto**

Previously, when all citations on a reading list were marked as complete and the reading list status is set to **Complete**, the **Current Request for Review** date did not update when the reading list was published, even when the parameter `send_list_on_published` ([Configuration > Leganto > List Management > Settings](#)) is set to `true`. Now, when a reading list is published, and the parameter `send_list_on_published` ([Configuration > Leganto > List Management > Settings](#)) is set to `true`, the **Current Request for Review** date updates to the current date regardless of the reading list citation status.

Note

The citation status only updates to **Ready for Processing** when the current status is set to **Being Prepared**. Reading lists that are already marked as **Complete** remain with a **Complete** status.

Code	Name	Status	Assignee	Owner/s	Due Back Date	Alerts	Current Request for Review	Course Code
02181293	Berlin in the Twentieth Century: A Cultural Topography	Ready For Processing	Miri Gerbi	Multiple	12/21/20...	✓	02/23/2022 10:56	02181293
0.5325580574...	Games of History: Games and Gaming as Historical Sources	Complete	Miri Gerbi	Multiple	07/31/20...	✓	01/09/2019 16:28	HI-132-1

Current Request for Review date

For more information, see [Configuring Reading List Publication Options](#).

- **August 2022 Leganto**

You now have the option to hide Zotero from the **User Menu > User settings > Citation Managers** section. To hide Zotero, set the parameter **zotero_enabled** (**Configuration > Leganto > General > External Integrations**) to `false`. The default setting for the **zotero_enabled** parameter is `true`. When set to `true`, instructors can integrate Leganto with Zotero from the **User Menu > User settings**.

For more information, see [Zotero](#).

- **August 2022 Analytics**

The **Students that Added Private Annotations** and **Students that Added Public Annotations** fields were added to Leganto Student Usage > Student Usage, indicating the number of students that added private and public annotations to a reading list, respectively.

- **July 2022 Fulfillment - Course Reserves**

To enable the library to communicate with course instructors and reading list owners, the following preferred email fields were added to the Course Reserves, Leganto Student Usage, and Leganto Instructor Usage Events subject areas:

- Review Requester Preferred Email > Reading Lists
- Reading List Owner Preferred Email > Reading Lists
- Course Instructor Preferred Email > Courses

- **June 2022 Leganto**

Cite It! now supports CiNii.

For more information, see [Adding a Citation from a Website \(Using Cite It!\)](#).

- **May 2022 Leganto**

Previously, when creating a new assignment by uploading a file, instructors had to send the reading list for library review so the library could process the citation, including the copyright approval which is required for students to view the assignment. To perform this action the instructor had to leave the assignments page and open the reading list. Now, when an instructor creates an assignment by uploading a file that requires copyright approval, the citation status updates to **Ready for processing**, sending the citation to the library for review.

For citations that do not need a copyright review, when the copyright status is approved, the status updates to the value configured for the parameter **citation_copyright_approved** (**Configuration > Leganto > Course Reserves Automatic Statuses**).

For more information, see [Uploading a New File and Creating an Assignment](#).

- **May 2022 Leganto**

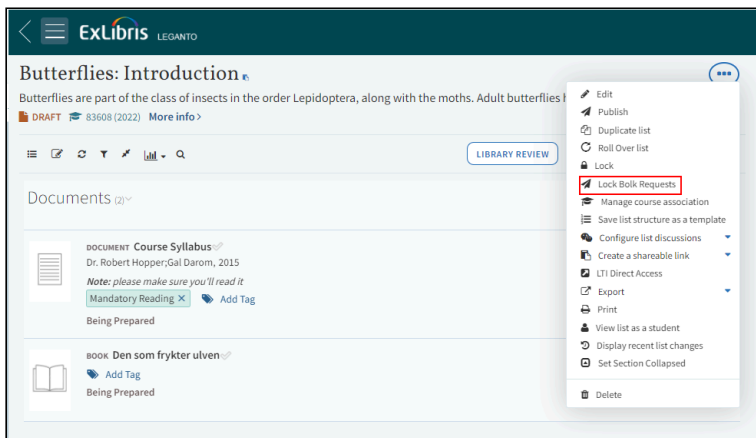

Cite It! now supports the following sites:

- Web of Science
- Aurora
- Bibliocommons — This only works when adding the site from the Full Details.

For more information, see [Adding a Citation from a Website \(Using Cite It!\)](#).

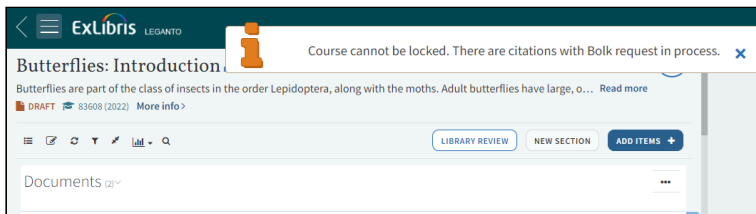

- **April 2022 Leganto**

For Norwegian customers, the list menu now includes the option to **Lock Bolk Requests**. When selected, and when there are no active Bolk requests, the list is locked. As a result, no further Bolk requests can be submitted. Enable this option by setting the `instructor_bolk_request` parameter (**Configuration > Leganto > List Management > Bolk Settings**) to `true`.

Lock Bolk Requests action

For courses with open requests, instructors receive the following message:

Alert - Course cannot be locked. There are citations with Bolk requests in process.

For more information, see [Locking Bolk Requests](#).

- **April 2022 Leganto**

For Norwegian customers, when submitting a copyright request to Bolk from Leganto, the number of students is now included in the Bolk request. By default, the **No. of participants** field is automatically populated from the course record in Alma. The number can be edited, but it cannot be zero. Editing the number of participants in the Bolk request changes the number of participants on the course record in Alma.

Create Bolk request

Instructor digitization request header

444 QA Course 0

Pages From: 1 to: 15 + Add another range

No. of participants: 0

Number must be greater than 0

Note 1: + Add another note

Advanced Search SEARCH

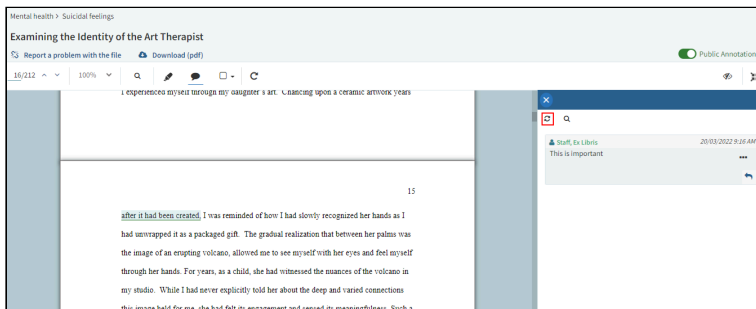

Customizable Course Status labels

- **April 2022 Leganto**

The **Public Annotations** comments section now includes a refresh icon

that can be used to refresh the document's annotations and highlights when many users are adding annotations at the same time.

Refresh icon for Public Annotations

- **April 2022 Leganto**

When creating an assignment by uploading a new file, a citation is created on the Leganto reading list. These citations

are now added to a new section in the reading list called **Assignments**. The label **assignment.default.section** ([Configuration > Leganto > General > Labels](#)) for the section name is customizable.

- **April 2022 Leganto SF: 06211071**

This feature is only relevant for institutions using Canvas. Previously, for institutions that use the Course Management System Roles Mapping table ([Leganto Configuration > LTI > Course Management System Roles Mapping](#)) to add instructors to Leganto course records based on the data in Canvas, users were added as instructors in Leganto if they were listed as instructors on any course in Canvas. As a result, students may have been incorrectly added to the Leganto course as instructors. Now, Leganto can be configured to add the instructor to the Leganto course only when he or she is the instructor for the same course in Canvas. To enable, you must first update the custom fields on the External Tool (for LTI 1.1) or the Developer Key (for LTI 1.3) in Canvas to include `lms_user_roles=$Canvas.membership.roles`. See the Developer Network [Instructions for LTI 1.1](#) and [Instructions for LTI 1.3](#) for details. Once the LTI tool has been updated, update the Course Management System Roles Mapping table to use the CMS role **TeacherEnrollment**.

- **April 2022 Analytics**

The **Num of Assignments** field was added to the Citations dimension in the Course Reserves, Leganto Student Usage, and Leganto Instructor Usage Events subject areas. It displays the number of assignments that are linked to a citation.

- **April 2022 Analytics**

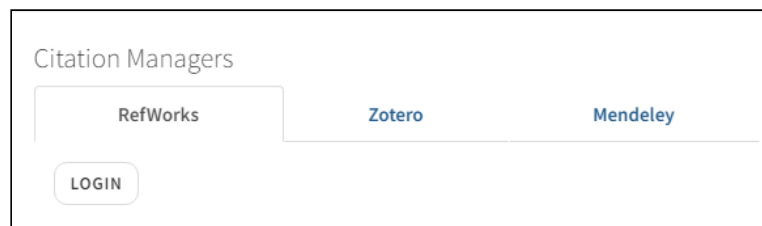

The **Num of Private Annotations** and **Num of Public Annotations** fields were added to the Citations dimension in the Course Reserves, Leganto Student Usage, and Leganto Instructor Usage Events subject areas. They display the number of private and public annotations of the citation.

- **March 2022 Leganto**

Leganto now supports RefWorks SSO authentication. When the parameters **refworks_client_id** and **refworks_client_secret** ([Configuration > Leganto > General > External Integrations](#)) are both configured by the library, end users can use the SSO authentication method. If either field is empty, end users see the regular RefWorks authentication.

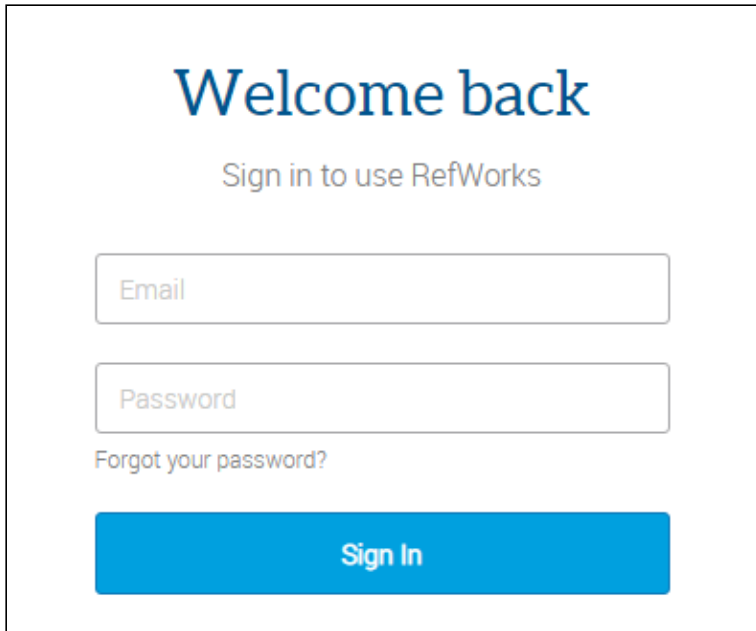

Note

The client ID and client secret are provided by RefWorks support.

Leganto end user settings when the library has configured RefWorks for SSO

Once the end user selects **LOGIN**, the authentication window appears.

Welcome back

Sign in to use RefWorks

Email

Password

[Forgot your password?](#)

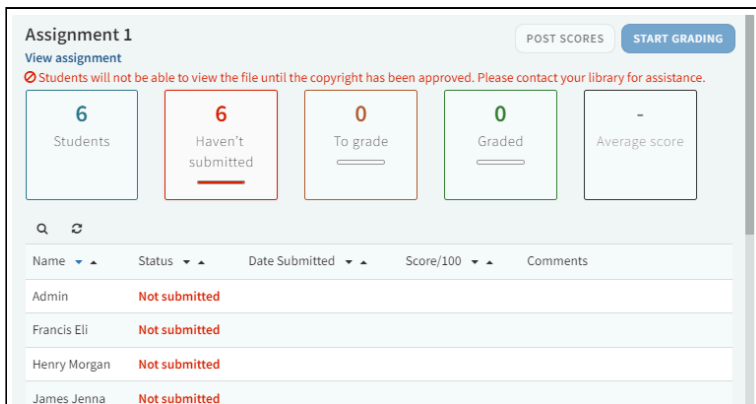

Sign In

RefWorks SSO authentication form

After authenticating, end users are redirected to the Leganto window where they can select **SAVE** to finish connecting their Leganto account to their RefWorks account.

- **March 2022 Leganto**

When the file linked to an assignment requires copyright approval, students cannot view the file until the copyright has been approved. Now, the instructor receives an alert on the assignment dashboard to let them know that students cannot access the assignment. The alert also suggests that the instructor contacts the library for assistance. This text is configurable.

Assignment 1 POST SCORES **START GRADING**

- **March 2022 Leganto**

The label **guest_search_page_message** Description ([Configuration > Leganto > List Management > Declaration Texts](#)) now supports html.

- **February 2022 Leganto**

For institutions that have not changed the default guided videos, the videos for **Adding_resources_from_the_library_video** and **Adding_your_own_resources_to_a_list_video** ([Configuration >](#)

Leganto > Features > Guided Videos) were updated.

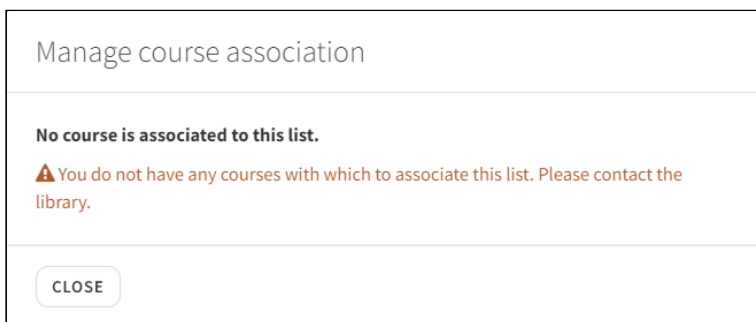

- **February 2022 Leganto**

For customers in Norway: Social reading on Bolk files and Bolk file downloads are now supported in Leganto. When a Bolk request is approved and the response contains a file, users can download the file, or view it in Leganto. As a result, the Social Reading features are now supported for Bolk files when users view them in Leganto.

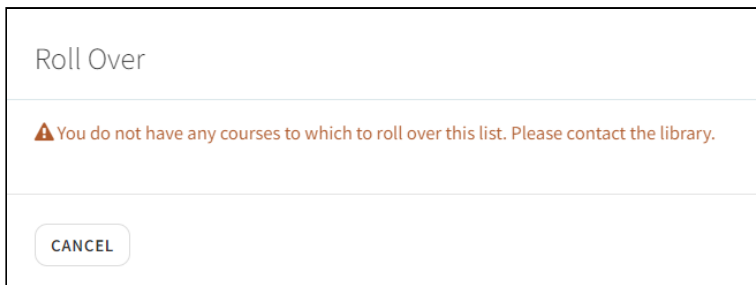

For more information, see [Integrating with Bolk](#).

- **January 2022 Leganto SF: 05314867**

If an instructor is not assigned to any courses, when selecting **Manage course association** or **Roll Over** list, a message now explains why the instructor cannot perform the action. The messages can be customized (**Configuration > Leganto > General > Labels > list.addCourse.course.noAssociatedCourse** and **list.rollover.noCourses**).

Unable to associate course

Unable to perform rollover

- **January 2022 Leganto**

For clarity, the Edit item and Cite It! labels **Source** and **Add Source** were changed to **URL** (**citation.field.source**) and **Add URL** (**citation.add.src.btn**). You can customize both labels in **Configuration > Leganto > General > Labels**.

Note

This change only applies to customers who have not previously customized the labels.

- **January 2022 Leganto SF: 05308576**

CiteIt! now also supports the following sites:

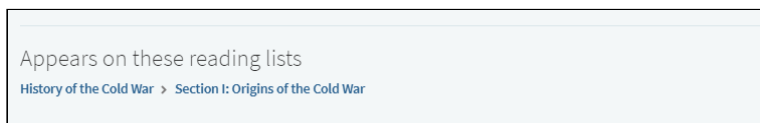

- LexisNexis store
- Cambridge

For more information, see [Adding a Citation from a Website \(Using Cite It!\)](#).

- **January 2022 Leganto**

Previously, the full citation view included an indication that an item is also on another reading list. To streamline the instructor and student experience and reduce confusion we are removing this indication.

The section was misleading to instructors and students because it only displays other reading lists on the user's "Lists" page and only citations which were linked to items in the Alma repository. As a result, it often displayed only the current reading list. Hence, it is not helpful to know that the item was on the reading list you are currently viewing, and the lack of other lists indicates that the item was not used on any other reading lists at your institution, which may not be true.

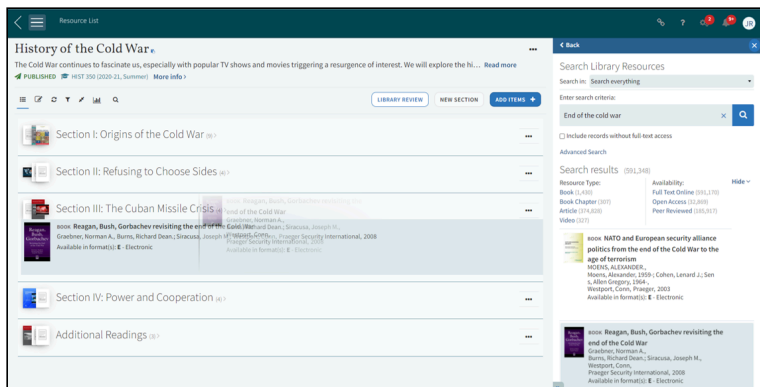

Removed in January: Appears in on other lists indication

- **January 2022 Leganto**

The flag **disable_resolving_for_no_fulltext_citations** ([Configuration Menu > Leganto > List Management > Settings](#)) was removed because it is no longer in use.

- **January 2022 Leganto SF: 05320505**

It is now possible to drag items to sections that are collapsed.

Dragging an item

- **November 2022 Fulfillment - Course Reserves**

When new items are manually added to reading lists in Alma, Alma attempts to link them to library resources using the resource locate functionality. In cases where there is more than one bibliographic record, Alma can be configured to link citations to bibliographic records according to preferred inventory type (electronic, then print, then digital, for example) When **resource_locate_multiple_matches** ([Configuration > Fulfillment > General > Other Settings](#)) is set to **first_by_inventory_type** and **resource_locate_multiple_matches_priority** ([Configuration > Fulfillment > General > Other Settings](#)) is configured, multiple matches are now auto-located according to priority. Previously, the option to have items with multiple matches located by inventory type was only used when items were added in Leganto and in the **Process and Enrich citations** job.

- **November 2022 Fulfillment - Course Reserves**

The **Course Visibility** field was added to the Courses dimension in the Course Reserves, Leganto Student Usage, and Leganto Instructor Usage subject areas and the Request for Course dimension of the Requests subject areas. It indicates if the course is archived or unarchived.

- **March 2022 Fulfillment - Course Reserves SF: 05300463**

Leganto now offers the option to present the reading list name in Primo search results. The reading list name is now added to the **CNO** \$ \$w. Multiple lists are divided by a semicolon (;).

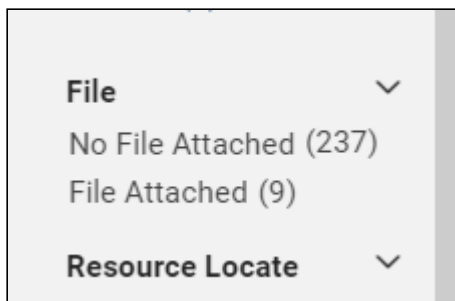

For more information, see [The Format of Published Data](#).

- **February 2022 Fulfillment - Course Reserves**

The **Citation Alma Digital Views** field was added to Course Reserves > Reading List Citations and Leganto Student Usage > Citations. It indicates the number of digital citation views during an active course.

- **January 2022 Fulfillment - Course Reserves**

On the **Edit Citations** screen, the facet labels under File were changed from **Exists** and **Not Exist** to **File Attached** and **No File Attached**.

File facet

- **January 2022 Fulfillment - Course Reserves SF: 05848830 05715135 05416589 05361476 05328522 05320310 05319647**

Itemized sets now support course sets that are larger than 1000 courses.

- **January 2022 Fulfillment - Course Reserves**

The following fields were added to the Reading List Citations dimension of the Course Reserves, Leganto Student Usage, and Leganto Instructor Usage Events subject areas:

- Citation Resolving Disabled – indicates if the resolving feature is disabled
- Is Digital Citation – indicates if the citation is a digital resource
- Citation AlmaD Downloads – the number of digital citation downloads during an active course
- Citation Library External Tags – the library external tags of the citation
- Section Library External Tags (added to the Leganto Reading List Sections dimension) – the library external tags of the section

Resolved Issues

- **December 2022 Leganto SF: 06514039**
In some cases, the Primo **Sign in** link appeared when it shouldn't have. This was fixed.
- **December 2022 Leganto SF: 06531138**
In some cases, items could be added to locked lists. This was fixed.
- **December 2022 Leganto SF: 06505007**
Previously, **Private notes** were viewable when viewing Leganto in **Student Mode**. This was fixed.
- **December 2022 Leganto SF: 06486072**
Previously, the Reading List **Sort by:** label **Last created** incorrectly displayed as **createdate (not listed)**. This was fixed.
- **December 2022 Leganto SF: 06503951**
When selecting annotations in Canvas on small screens, the screen focus did not jump to the section to which the annotation applied. This was fixed.
- **December 2022 Leganto SF: 06493418**
For type **Streamed Video**, the Alma **Pages** field now translates to **Duration**.
- **December 2022 Leganto SF: 06465690**
Previously, when changing the language setting, the Leganto UI did not update the language for Leganto labels until the page was refreshed. This was fixed.
- **December 2022 Leganto SF: 06405797**
In some cases, the Alma API ran very slowly, causing a timeout error when running jobs. This was fixed.
- **December 2022 Leganto SF: 06298387**
When a rollover was linked to more than one course, the multiple rollover prevention did not work correctly. This was

fixed.

- **November 2022 Leganto SF: 06493053**
When Rialto returned many search results, the scrolling option stopped working. This was fixed.
- **November 2022 Leganto SF: 06480200**
Multiple **Collaborator Email Notifications** generated without triggering an action to cause the emails to be sent. This was fixed.
- **November 2022 Leganto SF: 06488500**
The Resize divider bar did not work when viewing citations in full view or when editing a citation. This was fixed.
- **November 2022 Leganto SF: 06476610**
In some cases, when uploading a PDF, the citation **Type** was changed to **Article**. This was fixed.
- **November 2022 Leganto SF: 06471878**
Since it was not possible to see the right pane on mobile devices, we added an arrow button to open the right pane.
- **November 2022 Leganto SF: 06403866**
Previously, when the screen size was very small, the error message on the **Blank Form/Upload a File** window did not fit the window. This was fixed.
- **November 2022 Leganto SF: 06467390**
In some instances, the bottom of the brief citation menu was inaccessible. This was fixed.
- **November 2022 Leganto SF: 06464405**
An error was displayed when trying to view the members of an itemized set of reading lists. This was fixed.
- **November 2022 Leganto SF: 06465750**
When pushing items from Primo using the **Reading List** action, in some cases, not all the Leganto lists were displayed in Primo. This was fixed.
- **November 2022 Leganto SF: 06463291**
Previously, **Notifications** were marked as new even after opening the notification. This was fixed.
- **November 2022 Leganto SF: 06461772**
The **List Advisor** score appeared on the right pane even when the parameter **list_advisor_score** (**Configuration Menu > Leganto > List Advisor > Settings**) was set to **false**. This was fixed.
- **November 2022 Leganto SF: 06439258**
The option to open Refworks in a new tab did not always display. This was fixed.
- **November 2022 Leganto SF: 06444414**
Cite It! did not work with WILEY. This was fixed.
- **November 2022 Leganto SF: 06432535**
When mapping **Book Chapters** from Summon, the **Book Title** field was populated with the chapter title rather than the **Chapter Title** field. This was fixed.
- **November 2022 Leganto SF: 06419633**
The CLA **Scanning** line appeared twice. This was fixed.
- **November 2022 Leganto SF: 06398665**
The Leganto **Library Discussion** and **Citation** dates did not match the Alma date format. This was fixed.
- **November 2022 Leganto SF: 06353681**
Previously, the **Citation Alternate Suggestions** job did not find any electronic suggestions. This was fixed.
- **November 2022 Leganto SF: 06252489**
When changing a private annotation to public, the annotation still behaved as a private annotation. This was fixed.
- **November 2022 Leganto SF: 06263162**
Previously, the citation **Created by** field showed the username rather than the user's name. This was fixed.
- **November 2022 Leganto SF: 05331127**
Leganto sources were previously excluded from the Alma **Link Resolver Usage** report. This was fixed.
- **September 2022 Leganto SF: 06456134**
Previously, the **Reading List Bulk Update** job did not reset the **Reset number of citation views** when run. This was fixed.
- **September 2022 Leganto SF: 06442849**
BibTex imports did not map correctly for **Book** and **Book Chapter Titles**. This was fixed.

- **September 2022 Leganto SF: 06411238**
The label for reporting broken links extended out of the message box. This was fixed.
- **September 2022 Leganto SF: 05306851**
Previously, Springer Cite It! did not retrieve all authors. This was fixed.
- **September 2022 Leganto SF: 06389570 06378000 06375162 06371580 06370399 06368065**
Previously, when an item was in a temporary location and then returned to the library, Alma assigned the item a transit status for the Default Circulation Desk rather than directing the item to the correct location. This was fixed.
- **September 2022 Leganto SF: 05317315 05717745**
Updating a citation using the citation API caused the citation to move to a different section. This was fixed.
- **September 2022 Leganto**
Due to redundancy, the Full Mode icon

was removed from the PDF view.

- **August 2022 Release Update Leganto**
There are no issues for the August Release Update.
- **August 2022 Leganto SF: 06380050**
When copying citations in Leganto, the citation received an incorrect creation date. This was fixed.
- **August 2022 Leganto SF: 06398665**
The **Library Discussion** date format did not match the system date format. This was fixed.
- **August 2022 Leganto SF: 06388582**
Previously, users without user records in Alma still appeared on the **Reassign** list for Reading Lists. This was fixed.
- **August 2022 Leganto SF: 06382119**
Modifying the **Add Tag** label for a reading list overrode the **Add Tag** label for a citation. This was fixed.
- **August 2022 Leganto SF: 06378119**
Ebooks were listed in the Rialto search scope in Leganto when searching for printed books. This was fixed.
- **August 2022 Leganto SF: 06214754**
Adding a section note incorrectly created a **Copyright waiting for approval** task. This was fixed.
- **August 2022 Leganto SF: 06254067**
In Alma, the print slip for a citation failed. This was fixed.
- **August 2022 Leganto SF: 06232213**
Previously, the course loader job for updating courses did not indicate when some of the fields (name, number of participants) were changed. This was fixed.
- **August 2022 Leganto SF: 06266551**
Previously, copyright rules incorrectly checked against deleted reading lists. This was fixed.
- **August 2022 Leganto**
Previously, Cite It! did not import metadata correctly from Scopus. This was fixed.
- **July 2022 Leganto**
The integration profile for Desire2Learn was missing the editor button links. This was fixed.
- **July 2022 Leganto SF: 06369060**
The Broken Link Report **Details** link did not appear as a hyperlink. This was fixed.
- **July 2022 Leganto SF: 06381511**
Previously, the menu items were not displayed properly when resizing the screen. This was fixed.
- **July 2022 Leganto SF: 06339111 06383677**
Assignments with a **Self Declared** copyright status did not change the **Request Status** to **Complete**. Therefore, assignments were not available for students. This was fixed.
- **July 2022 Leganto SF: 06380050**
When duplicating a list, the **Created Date** used the original list's date rather than the date the list was duplicated. This was fixed.
- **July 2022 Leganto SF: 06347593**
The time stamp was missing from Reading List fields that contained a date. This was fixed.

- **July 2022 Leganto SF: 06369090**
Previously, when adding a file to the **Mark as broken** form, the file type defaulted to PDF rather than not defaulting to a file type. This was fixed.
- **July 2022 Leganto SF: 06369071**
Previously, it was not clear that the **View in Leganto** link on the right side of the Edit Reading List was clickable. This was fixed.
- **July 2022 Leganto SF: 06346892**
Search results from Summon did not output the correct metadata when displaying the data in Leganto. This was fixed.
- **July 2022 Leganto SF: 06260570**
Previously, there was no way to filter deleted citations when generating an Analytics report for Course Reserves citations. This was fixed.
- **July 2022 Leganto SF: 06318941**
When creating purchase requests, e-book citations were mistakenly created as journals rather than as books. This was fixed.
- **July 2022 Leganto SF: 06246728**
When editing a book chapter item, if the **Chapter Title** was missing, the form mistakenly indicated that the **Title** was missing rather than the **Chapter Title**. This was fixed.
- **July 2022 Leganto SF: 06291797**
The Primo action **Add to list** did not display all lists. This was fixed.
- **July 2022 Leganto SF: 06045777**
Previously, replying to a Public Annotation comment did not jump the PDF view to the expected text. This was fixed.
- **July 2022 Leganto SF: 05300318 06234578**
Previously, the citation source details were missing from Analytics. This was fixed.
- **July 2022 Leganto SF: 05300318**
In some cases, Leganto Analytics didn't include the citation URL. This was fixed.
- **June 2022 Leganto SF: 06361335**
Previously, the **Reading List Citation Task** job did not add tags to citations. This was fixed.
- **June 2022 Leganto SF: 06352129**
Previously, one of the guided tour instructions for using the library discussion was hidden from view. This was fixed.
- **June 2022 Leganto SF: 06346277**
The Bibliographic Style table default style did not use the correct style. This was fixed.
- **June 2022 Leganto SF: 06046216**
When importing an RIS file, some fields did not import correctly. This was fixed.
- **June 2022 Leganto SF: 06329584**
The material type for items of type "incollection" when importing citations in Bibtext was changed from **Book** to **Book Chapter**.
- **June 2022 Leganto SF: 06223558**
In some cases, when using the **Editor** button in the LMS, the wrong metadata was imported. This was fixed.
- **June 2022 Leganto SF: 06282232**
Previously, it was difficult to decipher if the **Public Annotations** toggle was enabled or disabled when viewed in Black and White mode. This was fixed.
- **June 2022 Leganto SF: 06256433**
Previously, when opening a course in Leganto through Canvas, and then opening a different course permalink in a new tab, the wrong course opened in the new tab. This was fixed.
- **June 2022 Leganto SF: 05308576**
Previously, Citelt! did not include all ISBNs from LexisNexis. This was fixed.
- **June 2022 Leganto SF: 05330603 06057247**
When importing an RIS file, resource locate did not work as expected. This was fixed.
- **May 2022 Release Update Leganto SF: 06361975**
When dragging a citation to a new section, the citation appeared to be duplicated until the page was refreshed. This was fixed.

- **May 2022 Release Update Leganto SF: 06320099**
In some cases, when updating a course using the API, instructors were removed from a response. This was fixed.
- **May 2022 Leganto**
Previously, grades could not be edited or deleted from the assignment's grade book in Leganto with the keyboard keys. This was fixed.
- **May 2022 Leganto SF: 06028337 06209954**
Instructors no longer receive notifications when a list does not have any collaborators.
- **May 2022 Leganto SF: 05326233**
Previously, courses with long names only showed part of the course name. This was fixed.
- **May 2022 Leganto SF: 05307415**
Leganto did not work when using the Canvas app. This was fixed.
- **April 2022 Release Update Leganto**
Previously, the Course enrollment job would fail when run. This was fixed.
- **April 2022 Leganto SF: 06051070**
Students with the instructor role could see other students' comments on assignments. This was fixed.
- **April 2022 Leganto**
When adding a comment to an uploaded file, comments are ordered according to the position on the file. Previously, new comments appeared at the top of the list until they were saved. This applies to private, public, and assignment comments.
- **April 2022 Leganto SF: 06283033**
Previously, Cite It! did not pull the **Author** and **Title** metadata from wiley.com. This was fixed.
- **April 2022 Leganto SF: 06212167**
In some cases, deleting citations with due dates did not work properly. This was fixed.
- **April 2022 Leganto SF: 06265130**
In some cases, email jobs were skipped instead of running. This was fixed.
- **April 2022 Leganto SF: 06241159**
Previously, users with instructor roles were able to view **Instructors/External Library** tags for lists that they did not own. This was fixed.
- **April 2022 Leganto SF: 06266570 06269914**
Citation dates were off by one day. This was fixed.
- **April 2022 Leganto SF: 06045460**
The list analysis load time was improved.
- **April 2022 Leganto SF: 06232192**
The visibility of the **Back (<)** symbol, depending on the background color, was improved.
- **April 2022 Leganto SF: 06250742**
Previously, updating a citation DCS Status caused an error. This was fixed.
- **April 2022 Leganto SF: 05303592**
Previously, the BIB sync job updated the citation modification date even when no updates occurred to a citation. This was fixed.
- **April 2022 Leganto SF: 06242402**
When instructors rolled over lists, the LTI links did not automatically point to the rolled over list for the instructor. This was fixed.
- **April 2022 Leganto SF: 06215722 06240613**
Previously, the **Search** bar blocked the filter list. This was fixed.
- **April 2022 Leganto SF: 06040109**
Previously, public annotations and embedded files were missing tooltips. This was fixed.
- **April 2022 Leganto SF: 05303291**
Self-registered users with missing mandatory fields were created even if fields were empty. This was fixed.
- **April 2022 Leganto SF: 05320648**
Previously, adding multiple citations from the clipboard to a collapsed empty section did not work. This was fixed.
- **April 2022 Leganto SF: 05313088**

- Previously, the Approval Request List ([Fulfillment > Approval Request List](#)) did not sort correctly. This was fixed.
- **April 2022 Leganto**
Browzine thumbnails did not appear when importing to Canvas using LTI 1.3. This was fixed.
 - **April 2022 Leganto SF: 06311741**
Embedding citations into Canvas did not always embed the correct thumbnail. This was fixed.
 - **April 2022 Leganto SF: 06242980**
In some cases, the PDF viewer did not open in a new tab. This was fixed.
 - **March 2022 Release Update Leganto**
There are no issues for the March Release Update.
 - **March 2022 Leganto SF: 06207343**
Previously, when removing the **mendeley_client_id** ([Configuration Menu > Leganto > General > External Integrations](#)), Mendeley still appeared in the User Settings. This was fixed.
 - **March 2022 Leganto SF: 05314438**
Archived lists did not appear for owners. This was fixed.
 - **March 2022 Leganto SF: 05321324**
After configuring mandatory fields for **More Details** fields, the red asterisk did not appear for most mandatory fields. This was fixed.
 - **March 2022 Leganto SF: 06046369**
Previously, reading list names were encoded incorrectly. This was fixed.
 - **March 2022 Leganto SF: 06231037**
The **COURSE_USER_ASSOCIATION** job did not distinguish between IMPORT and REMOVE types. Consequently, the required files were processed incorrectly. This was fixed.
 - **March 2022 Leganto SF: 05307225 05328932**
Previously, the **Start page** and **End page** fields appeared when the fields were empty. These fields are now hidden when empty.
 - **March 2022 Leganto SF: 06215010**
The top panel did not always appear when scrolling to the top of a reading list. This was fixed.
 - **March 2022 Leganto SF: 06217544**
The **link from CANVAS to here** option was hidden in the citation menu for locked lists. This was fixed.
 - **March 2022 Leganto SF: 05326642 06034311**
Opening a Hebrew citation in Leganto changed parts of the Alma UI to Hebrew. This was fixed.
 - **March 2022 Leganto SF: 06047167 05303318 05312482 05323768 05325037 06225331**
When creating a new course and trying to associate the new course with a new list, the **Start date** was incorrect. This was fixed.
 - **March 2022 Leganto SF: 05317049**
When selecting the **Copyright Status** link on a citation in Alma, the wrong ISBN appeared. This was fixed.
 - **March 2022 Leganto SF: 05306729**
If the **Total Required Pages** fields were populated with Roman Numerals, the Citation Copyright **Total Required Pages** outputted 0 pages. This was fixed.
 - **March 2022 Leganto SF: 05320993**
Changes to Leganto metadata caused the resource locate to work incorrectly. This was fixed.
 - **March 2022 Leganto SF: 06036792**
In some instances, duplicate purchase requests were generated on a citation. This was fixed.
 - **March 2022 Leganto SF: 05321411**
Librarians are now able to remove locked lists from My Lists.
 - **March 2022 Leganto SF: 05321604**
When no branding is configured, the top panel in Leganto is now the same color for logged in users and non-logged in users.
 - **March 2022 Leganto SF: 05305125**
Previously, the wrong title appeared in the warning message when deleting a citation of **Type** Book chapter. This was fixed.

- **March 2022 Leganto SF: 05306557**
Completed citations were included in the **Ready for Processing** facet. This was fixed.
- **March 2022 Leganto SF: 05308343**
The wrong message appeared for logged in users when a resource was not available. This was fixed.
- **March 2022 Leganto SF: 05325314**
When the parameter **add_auth_to_url** (**Leganto > General > Settings**) was set to true, some search links did not return the expected results. This was fixed.
- **March 2022 Leganto SF: 05324026**
Previously, the publication date did not appear for electronic articles. This was fixed.
- **March 2022 Leganto SF: 05331127**
Leganto sources were excluded from the **Link Resolver Usage** report. This was fixed.
- **March 2022 Leganto SF: 06053426**
Exporting lists with special characters in their names resulted in an error. This was fixed.
- **March 2022 Leganto SF: 05729522**
Mendeley searching returned an error. This was fixed.
- **February 2022 Release Update Leganto**
There are no issues for the February Release Update.
- **February 2022 Leganto SF: 05323215**
In some cases, an unneeded electronic link was displayed. This was fixed.
- **February 2022 Leganto SF: 06221147**
Links did not display correctly according to the on-campus configuration. This was fixed.
- **February 2022 Leganto SF: 06208962**
When creating items from the clipboard, the public note was not saved. This was fixed.
- **February 2022 Leganto SF: 05300473**
When adding items from Primo to a collection, the material type was wrong. This was fixed.
- **February 2022 Leganto SF: 05321885**
Previously, long annotations did not display properly. This was fixed.
- **February 2022 Leganto SF: 06041923**
Highlighted text in annotations now has a blue background color.
- **February 2022 Leganto SF: 05306533**
When using the reading list API to update a list with notes of type `Instructor` (library discussion), the note created was of type `Library`. This was fixed.
- **February 2022 Leganto SF: 06048753**
Previously, the Copyright Declaration did not appear in the sandbox environment. This was fixed.
- **February 2022 Leganto SF: 06234136**
Previously, files Read & Respond Assignments were not uploaded or created via LTI 1.3 in Canvas. This was fixed.
- **February 2022 Leganto SF: 06053426**
Previously, exporting a list with a special character in the file name caused the list to become corrupt. This was fixed.
- **February 2022 Leganto**
Previously, the course instructor appeared in the Student's tab. This was fixed.
- **February 2022 Leganto**
Previously, when creating a new section, the new section did not work according to the section configuration. This was fixed.
- **January 2022 Release Update Leganto SF: 06231070 06231898**
Previously, the API did not successfully pull licenses from the CCC. This was fixed.
- **January 2022 Release Update Leganto SF: 06049345**
When cookies are blocked and Leganto is presented in an iFrame the error message did not appear correctly. This was fixed.
- **January 2022 Release Update Leganto SF: 06238278 06242397**
Previously, tags were cut off at the right side of the screen. This was fixed.

- **January 2022 Leganto SF: 05301190**
The parameter **leganto_locate_by_single_field** (default false) was added to **General > Settings**. When set to true, and if **resource_locate_mode = OR**, Leganto will try locating according to a single field.
- **January 2022 Leganto SF: 05325083**
Adding articles from Summon did not change the citation status to **Complete** as per the configuration. This was fixed.
- **January 2022 Leganto SF: 05321898**
Summon author names were displayed incorrectly. This was fixed.
- **January 2022 Leganto SF: 05304858**
When creating a course with a name longer than 254 characters, an incorrect validation message appeared. This was fixed.
- **January 2022 Leganto SF: 05302488**
Previously, the **Resource Locate** job did not include a requester when creating purchase requests. This was fixed.
- **January 2022 Leganto SF: 05324751**
In some cases, changes to citations were not saved. This was fixed.
- **January 2022 Leganto SF: 05308756**
Requests were not sent to the DCS as expected. This was fixed.
- **January 2022 Leganto SF: 05308332**
The sections reordering problem was fixed.
- **January 2022 Leganto SF: 05305462**
Previously, the source field was not displayed for EOFFPRINT. This was fixed.
- **January 2022 Leganto SF: 05321324 05322843**
In some cases, configuring mandatory fields did not work as expected. This was fixed.
- **January 2022 Leganto SF: 05305053**
Previously, adding/removing a section tag did not generate notifications. This was fixed.
- **January 2022 Leganto SF: 05325482**
In Analytics, in the **Course Reserves** subject area, under the **Reading List Citations** folder, the field **CLA/DCS Link** was empty and did not calculate correctly. This was fixed.
- **January 2022 Leganto SF: 05306721**
The error messages on the **Citation** fields mapping configuration page were fixed.
- **January 2022 Leganto SF: 05314403 05324170 05324818 05325659 05325737**
Previously, recalculating copyrights when associating new courses was not working. This was fixed.
- **January 2022 Leganto SF: 05302380**
Previously, the student due date notification was not created. This was fixed.
- **January 2022 Leganto SF: 05317228**
Summon subtitles were not presented as part of the title. This was fixed.
- **January 2022 Leganto SF: 05316739**
Previously, filter labels were not translated. This was fixed.
- **January 2022 Leganto SF: 05302215**
In some cases opening the Alma digital viewer from Leganto would sign you out. This was fixed.
- **January 2022 Leganto SF: 05750288**
In some cases, duplicate rows existed in the guided videos mapping table. This was fixed.
- **January 2022 Leganto SF: 05326831**
Previously, **Modified by owner** was not supported. This was fixed.
- **January 2022 Leganto SF: 05322998 05305880 05303110 06028335 06028412 06028474 06028207 06028240 05308465 05304109 05306851 05320745**
