Fund Available Balance

December 2022 Rialto

Rialto users can now view fund balance details only for General Release orders not yet approved. Previously, the available balance did not account for any unapproved orders (cart items, title alerts, orders awaiting approval) with the same fund applied.

After applying a fund, Rialto displays the available balance, and the projected balance (the available balance less the summed total of items pending approval under that fund). The projected balance can be expanded to show the following for the applied fund:

waiting approval that includes the sum of orders not yet approved. Previously, the available balance did not account for any unapproved orders (cart items, title alerts, orders awaiting approval) with the same fund applied.

(the available balance less the summed total of items pending approval under that fund). The projected balance can be expanded to show the following for the applied fund:

- Available balance: the current available balance for the fund
- Total amount pending approval: submitted selections awaiting approval using the fund
- Total for items in the cart: total amount in the cart using the fund
- Projected balance: balance after pending approvals and cart total have been subtracted from the available balance from this fund.

This information is also included in the fund summary at cart confirmation.

Rialto Menu Option for Advanced Search

December 2022 Rialto

Users can now access the advanced search experience for Rialto from the side navigation. Select **Market > Advanced Search** to begin.

Advanced search from side navigation

See ["Searching the Rialto Marketplace"](#) for additional information.

Search List of Lists

December 2022 Rialto

Rialto users are now able to search for a preferred list, enabling them to quickly find the list they need to take action on. New search options were introduced to search the lists of lists by:

- List name (for user created lists and curated lists)
- List description (for user created lists)

Name	Description	Create Date
1 Poverty Studies 2022	Titles about different aspects of poverty in society	2022-11-01
2 Race, Class, & Gender 2022	Issues related to race, class, and gender	2022-10-03
3 LGBTQ+ Studies 2022	Titles focusing on LGBTQ+ themes	2022-09-02
4 Artificial Intelligence 2022	Titles about the use and applications of machine intelligence	2022-09-02
5 Simon & Schuster's First-Year Experience 2022	List curated by Simon & Schuster featuring fiction and nonfiction titles that align with the core purpose of college and university programs across the country—to support students in transition, promote engaging conversations, explore diverse perspectives, and foster community.	2022-08-04
6 Migration Studies 2022	Titles about the global movement of people and populations	2022-08-04
7 Disability Studies 2022	Titles relating to the study of individuals with disabilities including equal rights and inclusion in society	2022-08-04
8 Research & Study Skills 2022	Titles to help prepare first-year students and more advanced researchers for success	2022-07-05
9 Australia, New Zealand, and Pacific Islands Indigenous Studies 2022	Titles about the history, culture, and experiences of the indigenous peoples of Australia, New Zealand and the Pacific Islands	2022-07-05
10 Social Justice 2022	Titles about equity and justice in different aspects of society	2022-05-02
11 Cannabis Studies 2022	Titles relating to the study and use of products from the cannabis plant	2022-04-01
12 Women's History 2022	All new titles supporting women's history with both global and historical focus	2022-02-01
13 Decolonising the Curriculum 2022	Titles supporting diverse and inclusive viewpoints in education	2022-01-04
14 Black History 2022	Titles supporting black history studies	2022-01-04

List of Lists

Note

The results returned are the lists that match the search, not specific offers within the lists.

Owned by Others Label Revision

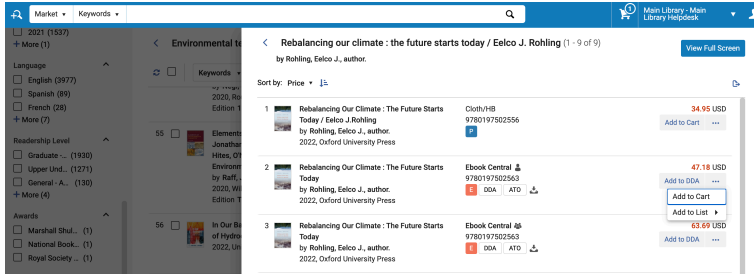

December 2022 Rialto

The text label, "Owned by others" or "Owned by Me" that applies to Title Alerts is revised. The modified label now reads as, **"In others' title alerts"** or **"In my title alerts"**.

Actions Added to Offers from "View All" Panel

December 2022 Rialto

In an earlier release, a panel was introduced allowing users to view all the offers available within a work from a single offer found on a list or feed. If users wanted to acquire an offer from the "View All" panel, they had to click a button to view all of them in a full page screen, and actions were present there. Now, these same actions (such as "Add to List" and "Add to Cart") have been added to the offers in the panel so that you can save time.

JSTOR DDA Now Available in Rialto

November 2022 Rialto

Idea Exchange

JSTOR's Demand-Driven Acquisition (DDA) program is now available in Rialto to further streamline your acquisition experience.

JSTOR's DDA program offers more than 115,000 ebooks from 300+ scholarly publishers. All titles are available in a DRM-free access model with unlimited simultaneous use. Ebook chapters are integrated with journal articles, primary sources, and images on JSTOR's platform to help researchers cross-search content.

To set up JSTOR DDA in Rialto, please contact Rialto customer support.

New to the Rialto Marketplace: Unebook

November 2022 Rialto

Librarians can now acquire 20,000 sought-after ebooks from Unebook through the Rialto marketplace. Unebook is the e-distributor for all books, monographs and content published by members of the Spanish Association of University Presses (UNE) and other independent and institutional academic presses from Spain and Latin America. Unebook's ebook collection primarily focuses on Humanities and Social Sciences content in Spanish.

Unebook is one of a growing roster of digital marketplace platforms available through Rialto. Acquiring these works directly through Rialto enables librarians to consolidate ordering and invoicing within a single system, saving time and steps.

Please contact Rialto customer support to enable the new platform, if you are unable to purchase.

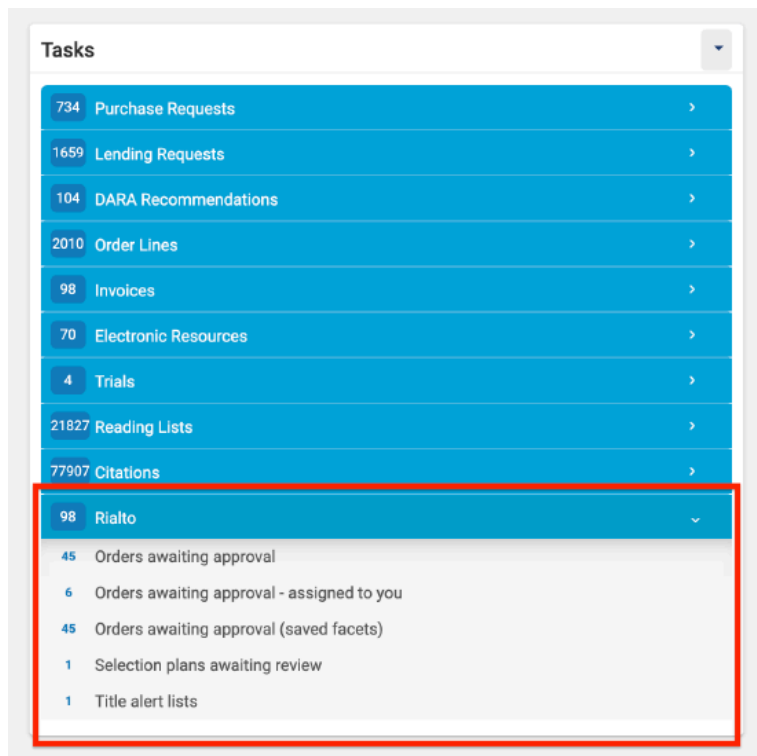

Rialto in Alma Task Widget

November 2022 Rialto

Idea Exchange

Rialto users are now able to view tasks alongside other tasks in the Alma **Tasks** dashboard widget and **Tasks** header. The new **Rialto** section is displayed in the Alma Tasks dashboard widget and in the Tasks list from the alma header.

Rialto in the Alma task widget

The new tasks are as follows:

- Orders awaiting approval (all orders)
 - This field displays the total count of orders awaiting approval, ignoring assignment values and any personal saved facets you may have previously applied
 - On click, this link navigates to the Orders Awaiting Approval page without saved facets
 - Available within the widget to users with the Rialto Manager role
- Orders awaiting approval (assigned to me)
 - This field displays the count of orders awaiting approval that are assigned to you
 - On click, this link navigates to the Orders Awaiting Approval page with the **Assigned to me** facet selected
 - Available within the widget to users with the Rialto Manager role
- Orders awaiting approval (saved facets)
 - This field displays counts of orders awaiting approval with your previously saved facets applied
 - On click, this link navigates to the Orders Awaiting Approval page with your previously saved facets applied
 - Available within the widget to users with the Rialto Manager role
- Selection plans awaiting review
 - This field displays the count of active selection plan snapshots that may require your review
 - Available within the widget to users that are able to review selection plans
- Title alert lists
 - This field displays the count of all title active alert lists assigned to you
 - Available within the widget to all users with title alert access

Publisher Lists

November 2022 Rialto

Idea Exchange

Rialto now enables administrators to create a list of publishers for other staff to include or exclude from queries. These publisher lists can be applied across multiple selection plans, title alerts, or recommendation feeds. Administrators can create one or more lists of publishers. List creation and modification can be accessed by selecting **Publisher Lists** from the side navigation under **Profiles and Rankings**.

Publisher Lists page (Manage Publishers)

The query builder contains a new option **Publisher Lists**, where all other Rialto users can elect to include or exclude a list from results.

Publisher lists in the query builder

Note

The list of publishers will be consulted at the time that the query is executed (not only when saving the query). If the list changes between executions, the most recent list will be used.

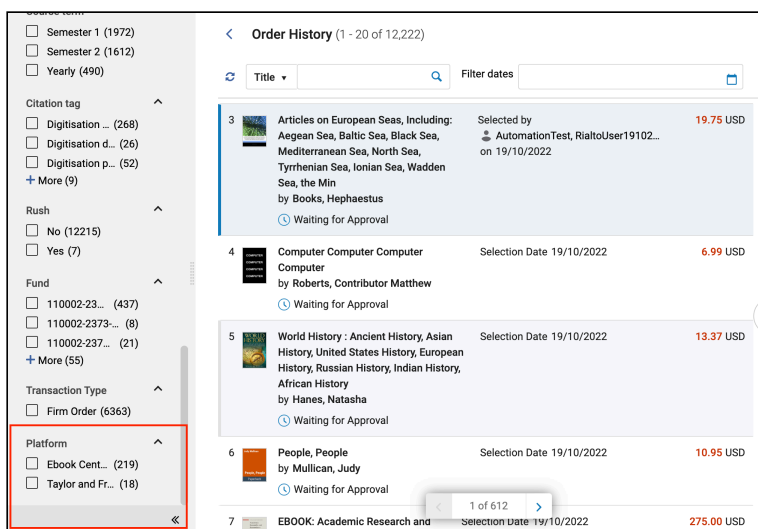

Platform in Order History and Orders Awaiting Approval

November 2022 Rialto

Idea Exchange

So that users can quickly identify orders by platform, Rialto now supplies users a platform facet to refine orders by from the **Order History** and **Orders Awaiting Approval** pages. A platform column with values is also present on export from these pages.

Order History Screen

Rialto Order Updates in Reading List Citation Alerts

November 2022 Rialto

Reading and citation list users are now able to monitor the progress of a Rialto order created from a reading list when viewing that reading list or citation. Rialto linked orders are now updated on the citation as follows:

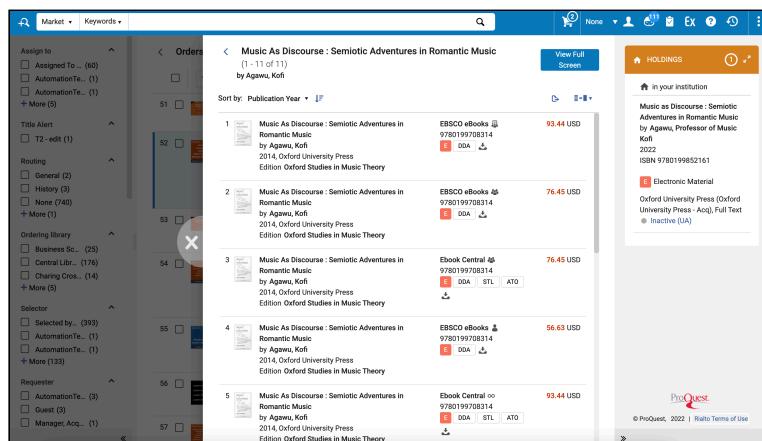

- **Rialto Order Placed** (when the order has been submitted)
- **Rialto Order Complete** (when the item has been received or activated)
- **Rialto Order Rejected** (when cart item was rejected from orders awaiting approval)
- **Rialto Order Cancelled** (when the order is cancelled)

As many of you already know, Rialto development periodically needs to take a "back seat," and maintenance, cloud infrastructure, and other important tasks need to be handled in order to ensure that Rialto meets the highest standards of performance and high availability. The October 2022 release is devoted to such tasks.

View All Offers on Feeds Page and Lists

September 2022 Rialto

Rialto now enables users to view all offers in a work, and all holdings, without having to exit their current workflow by navigating to another page. When users elect to view all offers in a work, a new panel opens with the offer list for that work (including all badges and information, but no facets). When users select an offer, the full panel displays the offer information.

Viewing Offers and Holdings

This new behavior can be found when selecting "view all" within the offer details on offers from the Feeds page, Curated Lists, Lists, Cart and Orders Awaiting Approval pages.

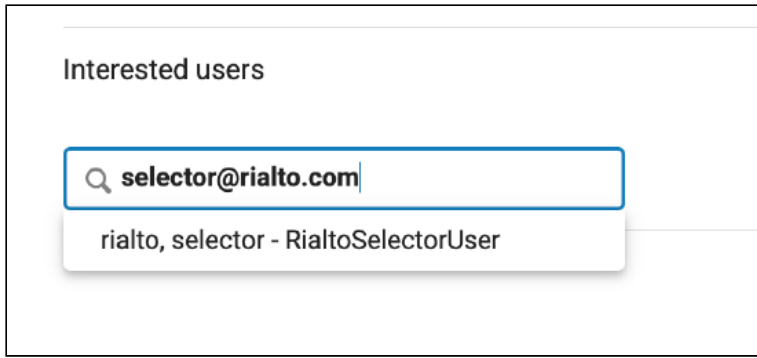

Note

Additional modifications were made to the Feeds page to support the new "view all" panel. See [Feeds page online help](#).

Search Interested User Field by Email Address

September 2022 Rialto

Users are now able to search the interested user field by email address wherever the interested user field appears within Rialto. This enables a more unique means to locate and add users other than by name.

Search Interested Users by Email

Note

The full email address must be entered for the search to work.
Only library staff with permissions to access Alma user information are able to search by email.

Searching and Purchasing from Citation and Reading Lists

September 2022 Rialto

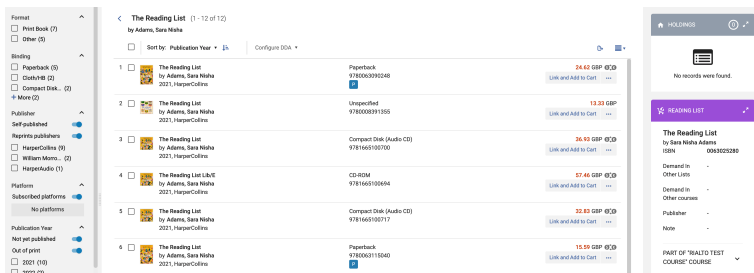

Idea Exchange

In testing: Users with access to modify reading and citation lists in Alma course reserves now have an option to search the marketplace directly from the lists, and place an order, without having to break their workflow. Similar to searching from a purchase request, a new button "Search in market" displays for each request on a list.

When the button is selected, the catalog of available titles in the Rialto marketplace will be searched using the information provided (title, author, and/or ISBN). On page load, when the title is available, the user is presented with the available offers. To aid in selection, the course information is present, as well as the holdings panel that will display any local or network zone holding matches.

When the desired offer is identified, selecting the "Link and Add to Cart" will ensure the record is linked when purchased. The item is now in the users cart, and a badge will appear on this offer throughout the marketplace so that other users are aware it is being worked on by another staff member.

Now the user can continue to checkout, or use the back arrow within the page heading to return to their list and continue to add to the cart.

Note

If you are interested in testing this feature, please contact customer support to enable it.

Automatically Cancel Orders in Alma

September 2022 Rialto

Idea Exchange

In testing: Orders cancelled by Rialto now can now automatically cancel the associated PO line in Alma and mark the cancellation reason as "Vendor canceled". Bibliographic records without inventory are deleted according to the manual cancellation logic (for instance, only if they are not linked to another inventory). This follows the standard metadata handling when canceling orders, including handling Institution, Network, and Community Zone situations.

Note

This functionality is disabled by default and is optional per institution. Please contact customer support to enable it.

Request Order Cancellation

September 2022 Rialto

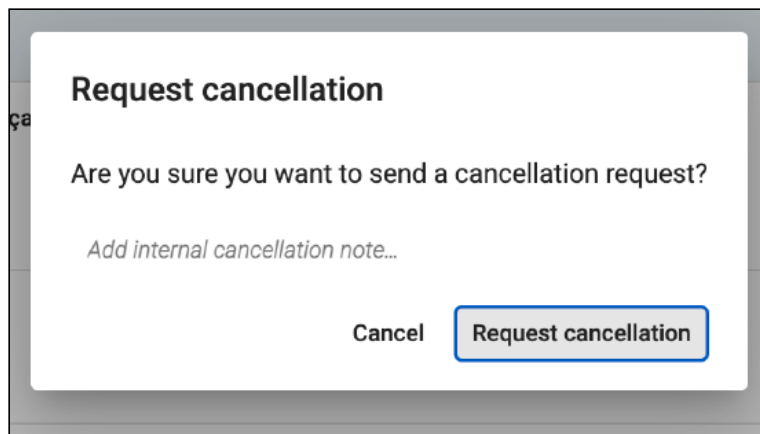

Idea Exchange

Rialto now enables users to cancel orders from the order history. For any order that is still in process, users are able to cancel the order from the "Cancel Order" button on the order history page.

Cancel Button

Upon selecting the button, users are presented with the following confirmation dialogue: "Are you sure you want to request cancellation?" Cancel order requests will be processed automatically as long as the offer is eligible to be cancelled.

Cancel Confirmation

Users can view the cancellation request from the Order History screen. After the cancellation is confirmed, a notification is sent that the order is canceled.

Rialto Ordering and Invoicing for Electronic Orders

August 2022 Rialto

Starting in August, we are beginning to move all Rialto libraries to the new ordering and invoicing system for electronic orders. This process is planned through the rest of the year and we will notify you 4 weeks in advance of your move date. These changes will improve your experience in the following ways:

- Reduced invoice quantity
 - Ability to combine all platform orders in a single invoice
 - Ability to include Ebook Central orders with Rialto orders in a single invoice
- Standardized invoice format aligned with ProQuest products
- Improved ability for ProQuest to proactively manage provider-related ordering issues
- Invoices available in Alma at the same time as the PDF
- Prepaid deposit accounts
- Option to automatically update Alma invoice as PAID when PQ receives payment

Note

Print orders are not impacted by these changes and you will continue to receive invoices as you do today.

The following invoicing options are available with the new ordering system:

- Frequency can be daily, weekly, or monthly
- The following fields can be used to combine or separate your invoices
 - Platform
 - Fund
 - Purchase type
- Ebook Central transactions can be included in your Rialto invoices. This is typically used for DDA, extended

access, or upgrade purchases directly in LibCentral

Note

By default, we will send as few invoices as possible. Invoices will be sent **weekly, combining platforms and funds** within a single invoice.

Deposit accounts are now available for any orders using the new ordering system. They have the following benefits:

- Self-serve using the ProQuest Invoice Portal
- Real-time balance tracking, including orders not yet invoiced
- Ability to add funds to your account at any time
- Ability to manage which transactions can be paid using the deposit, including Ebook Central transactions

Over the coming months, all pub-direct platforms will be moving to the new ordering system. Until each platform is moved, invoicing will continue as it was prior to the August release. Once the platform is moved, the above invoicing and deposit functionality will be available.

With the release of the new ordering system, you will see a change in order statuses for your Rialto orders. You may see the following statuses:

- Order Received
- Sent to Provider
- Fulfilled by Provider
- Access MARC sent
- Invoiced
- Invoice Paid
- Cancelled
- Not Yet Published

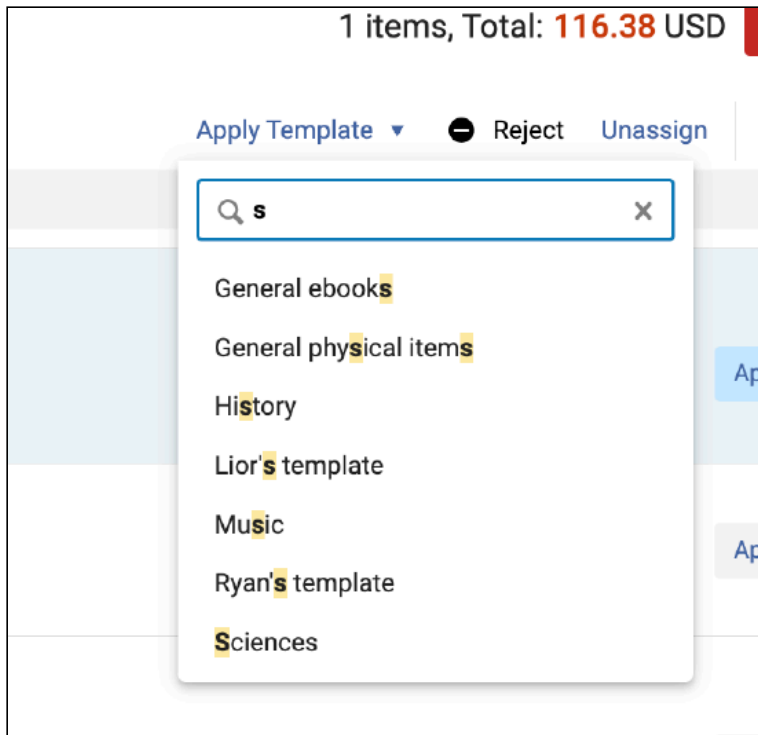

Search and Auto-Suggest for Apply Templates

August 2022 Rialto

Idea Exchange

Rialto now enables libraries to quickly and efficiently search for templates and apply them to the Cart or Orders Awaiting Approval. The enhanced search feature uses predictive text to the Apply Templates function that enhances search efficiency and reduces time spent searching.

Apply Templates search function

Date Last Sold

August 2022 Rialto

Users are now able to see the date a title in the market was "Last sold" which adds a better inclination for the title's availability (a title sold more recently is more likely to be easily sourced). The **Last sold** field will be displayed in the offer details with the date of the last sale.

Note

When an offer has no date of the last sale, "Unknown" will be displayed in the field.

<p>Details EAN/ISBN: 9783551551672 ISBN-10: 3551551677 Readership Level : Juvenile Full publication date: 01/12/1999 Added to Rialto: 24/06/2002 Last sold: July 2018 Pagination: 335 Size: 146 x 222</p>	<p>Details EAN/ISBN: 9783551552006 ISBN-10: 3551552002 Readership Level : Juvenile Full publication date: Unknown Added to Rialto: 08/09/2004 Last sold: Unknown</p>
---	--

Date Last sold field displayed in offer details

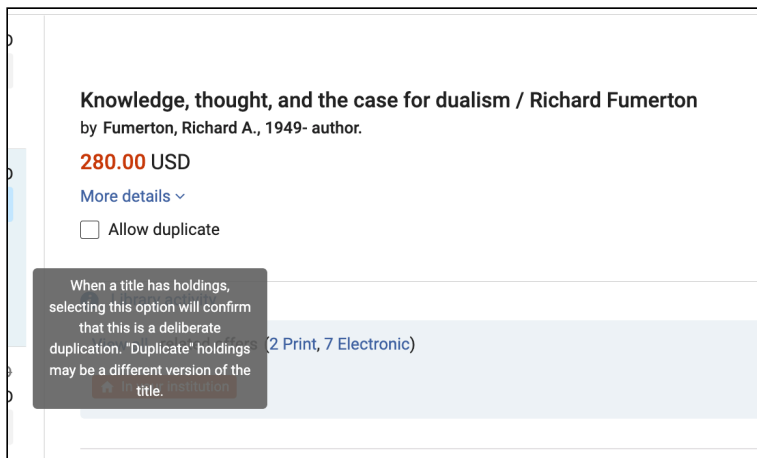

Allow Duplicate Checkbox Added to Cart

August 2022 Rialto

Idea Exchange

In testing: An optional **Allow duplicate** checkbox is ready to be enabled for use in the Cart and Order's Awaiting Approval. When enabled, a checkbox is displayed at the top of all cart values and when checked "allows" items with holdings to be submitted in the order. If a cart item has a holding attached to it and the user did not select the checkbox, a message appears to let the user know the order may not go through after a final holdings check. Note, if you are part of a consortia, Network Zone holdings will be included in the check. On cart confirmation, when holdings have been identified, the user is prompted to check the box to allow the order to proceed or remove it from the cart.

"Allow duplicate" checkbox

Note

Please contact Rialto customer support to enable the "Allow duplicate" feature.

New Filters for Publisher values

August 2022 Rialto

There are now two fields present in the query builder (used in advanced search, recommendation feeds, title alerts, and selection plans) for you to use to better refine your results when including or excluding publishers. The new fields are "Publisher (contains)" and "Publisher (exact)." The "Publisher (contains)" field allows for you to enter free text for a name value, and when used in a search, will either include or exclude all related values that contain the name entered. The "Publisher (exact)" field requires for you to select an exact name after entering text, and when used in a search, will either include or exclude all the values that fall under the exact text selected. Previously, the publisher field was performing an exact search, so all profiles that utilized the publisher field have been replaced with "Publisher (exact)."

Publisher (contains)

Publisher (exact)

New Publisher fields

Exclude Network Holdings for Selection Plans

August 2022 Rialto

Rialto now allows universities that are part of a consortia to exclude network holdings from all list results in selection plans. This exclusion process executes both when drawing up the list of plan results for review and when executing the purchase/add to Demand Driven Acquisitions (DDA) actions.

Network holdings optional exclusion on Selection Plan configuration screen.

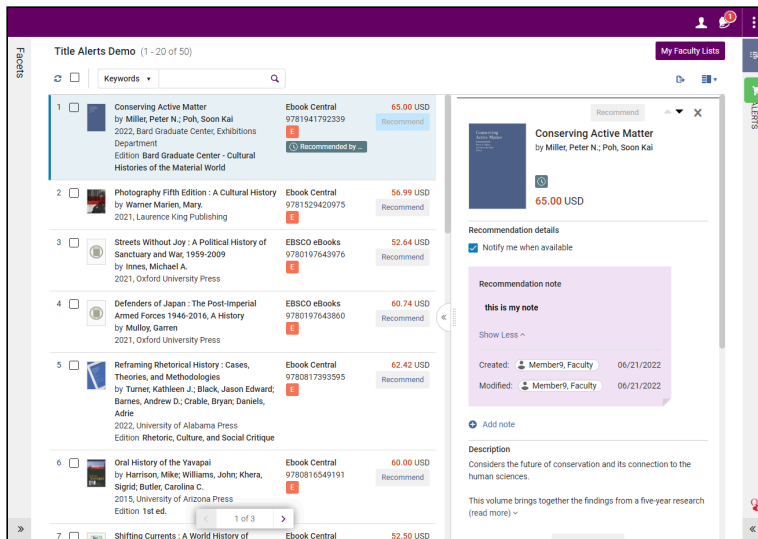

Faculty Title Alerts

July 2022 Rialto

Ready for initial testing: Similar to Title Alerts, Faculty Title Alerts is a new feature in Rialto that enables library staff to auto generate lists of titles to be sent to faculty for review. Faculty receives an email notification when a new list is ready. A link inside navigates them to a limited display within Rialto, where they can view and approve the suggested titles from the most recent. Faculty can utilize the internal note field to include pertinent information for ordering. To further streamline purchasing, each offer has cart fields assigned which are pre-configured by library staff when creating the title alert. These cart fields are not visible in the faculty list view, but carry over along with any notes after being submitted.

Once faculty have submitted a list for approval, library staff may make edits to the cart fields, and then submit either the title for approval (Selectors) or immediately approve the title (Purchasing operators or Rialto managers) from a new **Review faculty-recommended titles** page.

For more information, see [Faculty Title Alerts](#).

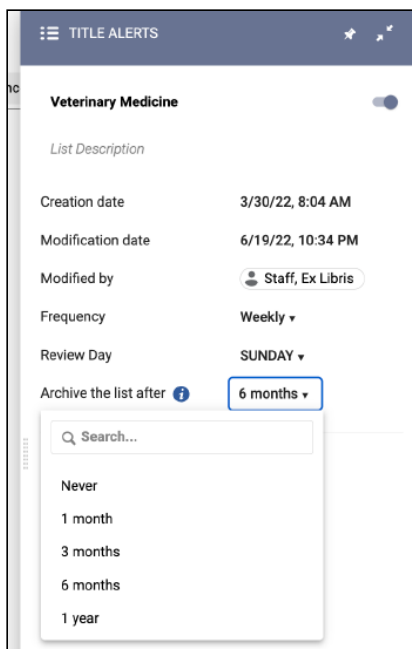

Review Faculty Recommended Titles

Title Alerts: Archive and Delete

July 2022 Rialto

To prevent Title Alert lists from becoming cluttered, a new **Archive** action is introduced. Archiving a list run removes it and its contents from being displayed when viewing all titles, and when viewing the list history (unless filtered to display statuses other than "Active"). Faculty are not able to view archived lists, and the Title Alerts badge is removed from all offers when viewing them elsewhere within Rialto.

Archiving can be performed manually, and will also take place automatically. By default, all list runs are set to archive after six months from their creation date. Archive frequency can be adjusted within the Title Alert configuration screen.

Lists can be manually archived from the list itself, or from the list history.

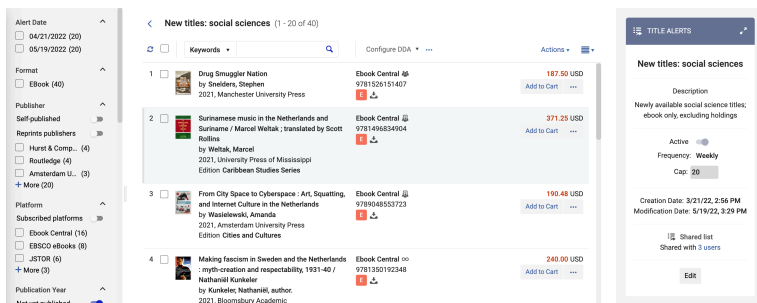

An archived list can be restored if needed from the list history, or the list itself.

All archived lists are now **deleted** one year from their archived date.

Title Alerts

June 2022 Rialto

Title Alerts is a feature in Rialto that enables staff to create lists of titles for review according to a user-defined query and ranking. Differing from recommendation feeds, title alerts create a finite set of titles drawn up at predefined intervals—weekly, biweekly, or monthly. Users can optionally be emailed when new alerts are created.

Title alerts may also be:

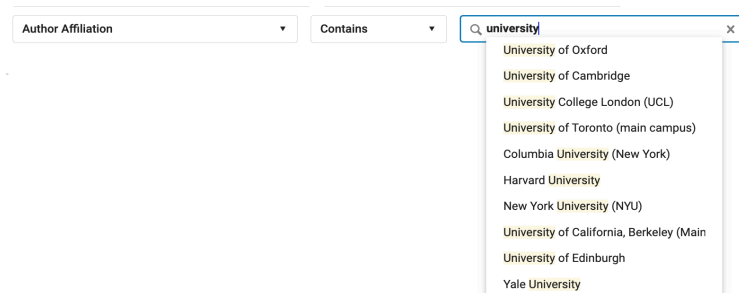

- Managed by individual staff members or shared between multiple staff.
- Reviewed individually or as a merged list of all alerts.

For more information, see [Title Alerts](#).

Author Affiliation

June 2022 Rialto

Rialto now enables selectors a simple way to search for works by authors affiliated with their institution, so that they can purchase material written by their institution's staff. **Author Affiliation** is now present as a searchable value withing the Query Builder. Select the **Author Affiliation** field in the Query Builder, and enter the institution name in the search box.

To aid in validating the results, **Author Affiliation** now displays in the offer details (when available)

Details

Author affiliation: Edinburgh College of Art, University of Edinburgh

EAN/ISBN: 9781780235585

ISBN-10: 1780235585

LC Classification: GT2079

LC Subjects :

DESIGN / General; DESIGN / Fashion & Accessories

For more information see, [Managing Recommendation Profiles and Feeds](#).

Saved Context When Navigating Across Pages

June 2022 Rialto

Now when users browse across multiple pages, when navigating back to the previous page their context will not be lost. E.g.: You are several pages deep in a list, and then click to view all offers in a work group from a "related activity" link. Previously, when navigating back to the list, you were placed on the first page of the list. Now, when navigating back to the list you are taken back to the page you were last on, focused on the offer you viewed in detail.

Stored Preferences for Lists

June 2022 Rialto

Now users can save applied facets in the Facets panel for lists, so that preferred facets are applied on page load in future sessions. Sort selections are also stored, independent of the facet save action, and will remain applied at the page level. This reduces time and clicks when pages reload.

For more information see, [Saving Selected Facets and Sort Selections for Future Sessions](#).

List of Lists View - Display Number of Items in a List

June 2022 Rialto

Users are now able to view the total number of items in a list, at a glance, from the List of Lists view, so that they can quickly identify lists that may need attention. On the **List of Lists** page view, users are presented with a new column for the **Number of items in the list**. Each row under the column displays the current number of items in the given list.

< My Lists (1 - 3 of 3)

Display: All

Name	Description	Modification Date	Visibility	Number of Items	Modified by
1	German language	05/19/2022	Private	31	Staff, Ex Libris
2	End of year wishlist	05/19/2022	Private	6	Staff, Ex Libris
3	Tikva's list	05/19/2022	Shared	2	Staff, Ex Libris

Activate/Deactivate Rules in a Selection Plan

June 2022 Rialto

Selection plan rules have a new **Active/Inactive** status. Rules may be toggled to inactive. Inactive rules will not retrieve results, and will have no impact on plan results when generating snapshots or on subsequent plan runs while inactive. Inactive rules will also not exclude matched results for later runs.

A rule's status of **Active** or **Inactive** is reflected in the list of rules (alongside name and description).

< Social Sciences

Query	Rules
1	<input type="checkbox"/> History Created 03/18/2022
2	<input checked="" type="checkbox"/> Political Science
3	<input checked="" type="checkbox"/> Economics
4	<input checked="" type="checkbox"/> Geography

For more information see, [Selection Plan Management](#).

Control Interested User Options

May 2022 Rialto

Beginning in May, Rialto will begin to rely on Alma configurations for interested user notification preferences. So, if your institution has configured notification settings for interested users within Alma, Rialto will respect those settings when adding items to the cart through any workflow.

The default selection of interested user notification options can be defined by the institution in the configuration menu (**Configuration Menu > Acquisitions > General > Other Settings**). The following customer parameters pertaining to interested users are incorporated by Rialto:

Parameter	The option it controls	Default value of parameter
po_line_hold_item_for_interested_users	Hold Item	False
po_line_notify_interested_users_upon_receiving_activation	Notify user upon receiving/activation	True

Parameter	The option it controls	Default value of parameter
The parameter below is not incorporated in the interested users options in Rialto:		
po_line_notify_interested_users_upon_cancelation	Notify upon cancelation	False

For more information on the interested users options, click [here](#).

Excluding Facets

May 2022 Rialto

Previously in Rialto, within the facets found on many pages, users were able to focus or include results by selecting specific categories. Now, in addition to including, users are able to exclude selected categories from the results within facets. Selecting the checkbox at the end of each category listed in each facet excludes the category from the results. Each excluded facet category will be displayed at the top of the facet panel with an

icon.

Note

The exclude facets option is enabled in all pages with facets except **My Feeds!** The My Feeds page can already perform exclusions in the query that pertains to the specific feed.

Bulk Upload - Results Display

May 2022 Rialto

The display of results for completed bulk uploads has been enhanced. The results are now grouped and displayed in three possible result counts, as described below:

- Exact ISBN match
- Alternate version
- Skipped

demo.xlsx 04/07/2022 		
4 Titles Exact ISBN match	2 Titles Alternate version chosen	3 Titles Skipped

Bulk Upload - Display Results

Clicking the

button downloads a list of all the ISBNs that were in the uploaded file, alongside their upload status and message, in a .xlsx file.

Note

The download icon now appears only by the file name and not alongside the individual result tiles.

In Testing: Title Alerts

May 2022 Rialto

Title Alerts is a new feature in Rialto that will allow staff to create lists of titles for review according to a user defined query and ranking. Differing from recommendation feeds, title alerts create a finite set of titles drawn up at predefined intervals—weekly, biweekly, or monthly. Users can optionally be emailed when new alerts are created.

Title alerts may also be:

- Managed by individual staff members or shared between multiple staff.
- Reviewed individually or as a merged list of all alerts.
- Marked “done” to indicate that they’ve been reviewed

If interested in becoming an early tester, please contact your Rialto Customer Success Manager.

New to the Rialto Marketplace: John Benjamins e-Platform

April 2022 Rialto

Librarians can now acquire 4,000 sought-after ebooks from John Benjamins e-Platform through the Rialto marketplace as of April 4th. John Benjamins is an independent academic publisher specializing in content related to Language and Linguistics, Translation Studies, Cognitive Science, Philosophy, and more. Through the John Benjamins e-Platform, all ebooks are available in a DRM-free, unlimited-user model.

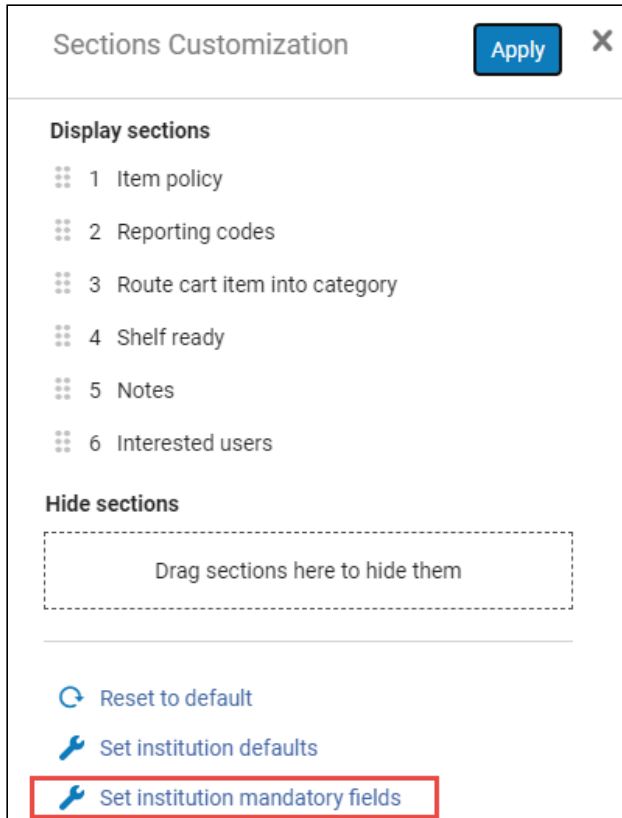

John Benjamins e-Platform is one of a growing roster of digital marketplace platforms available through Rialto. Acquiring these works directly through Rialto enables librarians to consolidate ordering and invoicing within a single system, saving time and steps.

Please contact Rialto customer support to enable the new platform, if you are unable to purchase.

Configuring Institution Mandatory Cart Fields

April 2022 Rialto

The Rialto Administrator can now configure Cart and Orders Awaiting Approval fields as mandatory for order submission, to ensure that certain fields are required with orders by selection and acquisition staff.

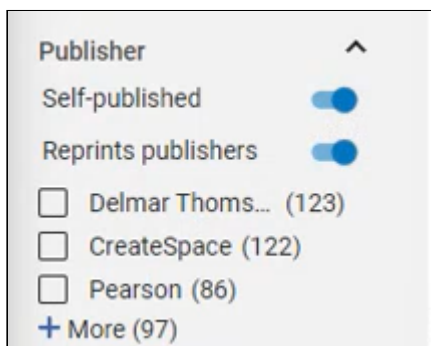

See [Institution-level Cart and Orders Awaiting Approval Task List Customizations](#), [Institution-level Customizations of the Orders Awaiting Approval Task List](#), and [Personalized and Institution-level Cart Customization](#).

Publisher Toggles for Reprint & Self-Published

April 2022 Rialto

New toggles now appear under the Publisher facet: **Reprint** and **Self-Published**. Now staff can refine search results, lists, and feeds by publisher type as a category and not per publisher.

See [Working with Facets](#).

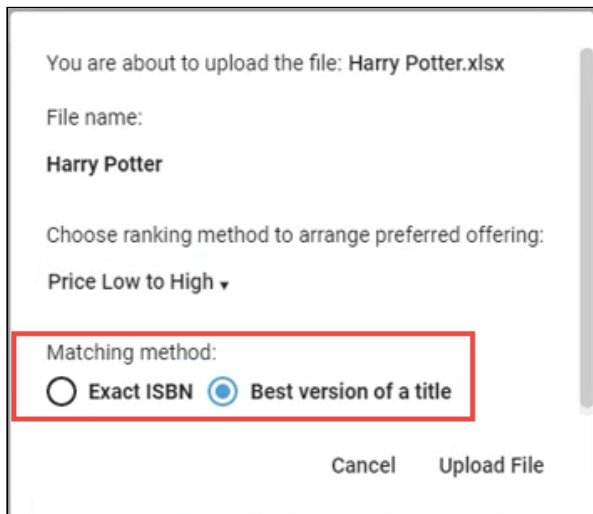

Matching Method for Upload to List

April 2022 Rialto

Now you can select how titles match when uploading to a list, so that you have a better expectation for the outcome of the

upload. The possible options are:

- **Exact match to list**
 - Only adds a title to the list when it has the same ISBN as the loaded file
 - When multiple offers (e.g., different licenses) exist for an ISBN, the added offer is determined by the selected ranking profile.
- **Best version of a title**
 - The ISBN match occurs, then the best offer is determined from the matched work (even when the ISBN is different) by the selected ranking profile.

See [Searching in Bulk by Uploaded File](#).

Stored Preferences for Search Results

April 2022 Rialto

Now users can save applied facets in the Facets panel for search results, so that preferred facets are applied on page load in future sessions. Sort selections are also stored, independent of the facet save action, and will remain applied at the page level. This reduces time and clicks when pages reload.

Note

Saved search facets will also apply when searching the market from a purchase request, and vice versa.

See [Saving Selected Facets and Sort Selections for Future Sessions](#).

Advanced Search (Beta) in Rialto Marketplace

April 2022 Rialto

Users can now perform advanced searches on any field available in the Query Builder and see results that match all filters

in that search. This is the beta version, and additional fields will be introduced soon to support more granular searching.

See [Using Advanced Search](#).

Bulk Action for 'Create New List'

April 2022 Rialto

A new bulk action **Create New List** now appears on all screens where offers can be added to lists.

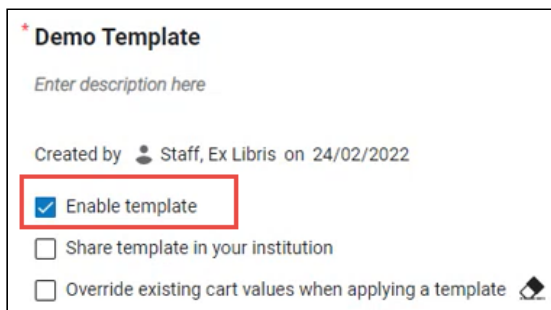

Continuing the development from March 2022, this option allows you to create a new list from multiple offers at once (see [Creating a New List from an Offer](#)). Upon list creation, the selected offers are added to the new list.

Enabling/Disabling Cart Templates within the Template Editor

April 2022 Rialto

You can now see whether a template is enabled from the Template Editor, while creating/editing the template. When you enable/disable a template via this checkbox, the state of the template is reflected in the toggle in the right pane.

In addition, all templates that are created are now enabled by default.

See [Cart Template Management](#).

Default Settings for Interested User in a Cart Template

April 2022 Rialto

When adding a interested user to a cart template, the "Notify when received" value is now selected by default, saving staff additional clicks. You can clear this selection in the template if you choose to. You can also apply or clear the "Place on hold" option as needed.

Last Run Date added to Selection Plan List

April 2022 Rialto

On the Selection Plan page, users can now see the date that an active plan last ran, so that you know at a glance when the last automated action took place.

Active	Name	Description	Modification Date	Created by	Modified by	Frequency	Review Day	Last run	Next Review Date
1	✓	Analyst & Mechanics	13/03/2022	↓ Staff Ex Libris	↓ Staff Ex Libris	Weekly	Sunday	13/03/2022	20/03/2022 - 7 days left for review
2	✓	Drive & Deliveries	13/03/2022	↓ Staff Ex Libris	↓ Staff Ex Libris	Weekly	Sunday	13/03/2022	20/03/2022 - 7 days left for review

Duplicating Selection Plan Rules

April 2022 Rialto

Now users can create a new Selection Plan rule by duplicating an existing rule. This will help to save time and eliminate errors when performing complex queries exist within rules.

See [Creating a Selection Plan Rule](#).

Profile Captured on Selection Plan History

April 2022 Rialto

Now Rialto Administrators can see the query and rules that informed a Selection Plan run when viewing the details from a plan's History. This allows users to track how Selection Plans changed over time.

To support this, the action **Associated Profile Configurations** was introduced.

ID	Date	Purchased	Added by ODA	Shipped	Status	Total Spent	Additional Details
1	03/07/2022	4	0	0	Completed Successfully	162.00 USD	
2	03/07/2022	3	0	0	Completed Successfully	97.00 USD	<ul style="list-style-type: none"> Associated Profile Configurations

Note

This information is available only for the runs running from the day of the April 2022 release and on. It is not available for runs that run prior to that date.

See [Viewing the query and rules for historical runs of the plan](#) and [Managing Rialto User Roles](#).

Switch to the New Orders Awaiting Approval Task List and Cart

March 2022 Rialto

In the March release, all users will be switched to the updated Orders Awaiting Approval and Cart pages. These screens were first released in May and October of 2021, and were previously hidden by a customer parameter, requiring enablement by support. Going forward, all current and newly-onboarded institutions will be using the newer screens.

See [Reviewing and Approving Orders](#) and [Orders Awaiting Approval](#).

Stored Preferences on the Orders Awaiting Approval Page and Cart

March 2022 Rialto

Now users can save applied facets in the Facets panel on the Orders Awaiting Approval Task List and Cart pages, so that preferred facets are applied on page load in future sessions. Sort selections are also stored, independent of the facet save action, and will remain applied at the page level. This reduces time and clicks when pages reload.

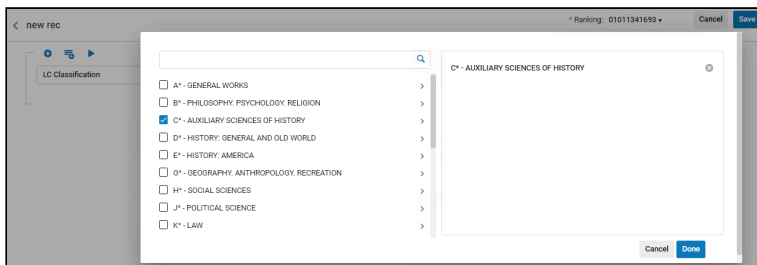

See [Saving Selected Facets and Sort Selections for Future Sessions](#).

Query Builder Enhanced Display

March 2022 Rialto

The Query Builder was enhanced with a more convenient and user-friendly value selector for multi-select fields (such as 'LC Classification', 'Dewey', 'Collection (Beta)' and 'NLM Classification'). This selector provides more room for the longer headings, enables searching for particular terms, and features the **Cancel** button that brings you to the main screen if you want to quickly cancel the selections you were making.

See [Managing Recommendation Profiles and Feeds](#).

Creating a New List from an Offer

March 2022 Rialto

Staff can now create a new list from an offer, to group the offers they are interested in by a category of their choice on the fly. Upon list creation, the selected offer is added to the list. This is possible on all screens offers can be added to lists.

Once the list has been created, you can open it in the **My Lists** page, provide a description for it, and to share the list with other users.

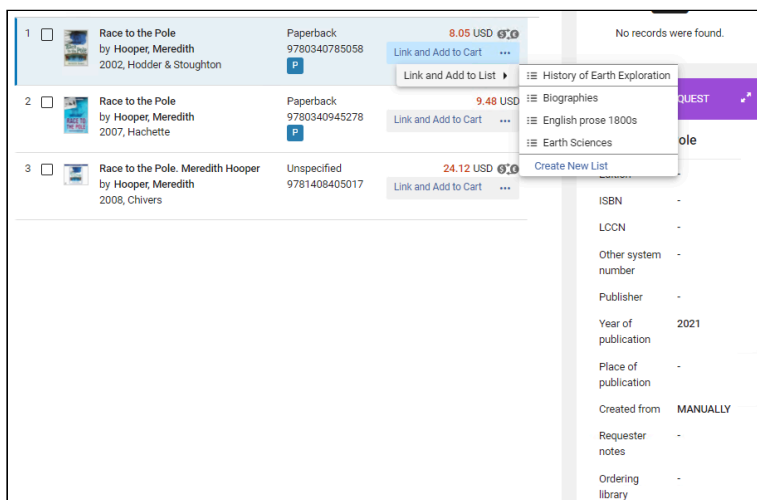

See [Creating a List from an Offer](#), [Rejecting Offers](#).

Purchase Request Link When Adding to List

March 2022 Rialto

A new row action "Link and add to list" was added to offers after searching in the market from the **Manage Purchase Request** page. Now when you add an offer from a Purchase Request to a list, the purchase request remains linked so that the information is not lost if you choose to manage the request from a list and not the Purchase Request screen.

Once the Purchase Request is linked to the list, the "Purchase Request" badge displays on the item, and the Details panel opens on click.

Just like when linking and adding to a cart, when the Purchase Request is linked to the list, it becomes assigned to the user who added it to a list, with a status "Request status: In Rialto User List" (see [Purchase Requests](#)).

The Purchase Request closes automatically when the offer is purchased.

See [Ordering from Purchase Requests](#).

Duplicating a Cart Template

March 2022 Rialto

Now you can create a new cart template by copying another and making changes to it, in order to save time when creating many templates at once. The new template is created with the name of the previous template + "copy". All other cart values are taken from the source template

See [Cart Template Management](#).

Offer Details Enhanced

March 2022 Rialto

On the offer Details pane, the following information has been added:

- Book Type - This will display the type of offer you are evaluating for purchase (map, workbook, dissertation, etc.), so that you can make a more informed decision within Rialto, and do not need to search elsewhere for this information.
- Reprint - This is a yes/no field that will indicate when we are aware if a title is a reprint or not.
- Pagination - This will display the number of pages in the book.
- ISSN - When part of a series, the ISSN will display here.
- Illustrations - This will display when books have illustrations, tables, or other visuals.
- Size - For physical materials, this displays the dimensions of the offer.
- LC Card Number - when known, the number will display here.

Modified fields on the Details page:

- Downloadable - this display will reflect whether the full text, or a chapter in an offer is downloadable. When the title is not downloadable, this shows as "Not available."
- DRM free - when an item is not DRM free, we now display "Not available" on the line.

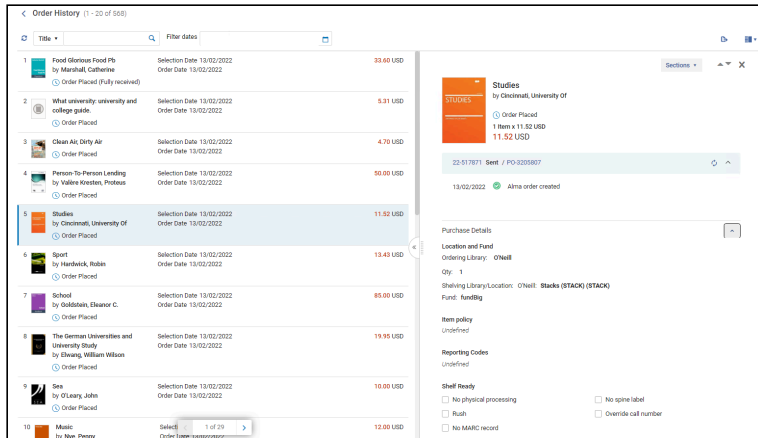

Order History Contains Submitted Cart Values

March 2022 Rialto

You can now see additional purchasing information on offers in the Order History page, so you are aware of the values submitted to acquisitions/ProQuest.

The following information displays under "Purchase Details":

- Item policy
- Reporting codes
- Interested Users
- Cart Routing
- Shelf Ready values
- Notes

New Filter for Publication Type in the Query Builder

March 2022 Rialto

A new filter for Publication Type was introduced in the Query Builder. This allows you to exclude or include titles that are known to be reprints or self published, so that you can better refine your feeds and Selection Plans to produce optimal results.

See [Managing Recommendation Profiles and Feeds](#).

Default POL Types Instead of Hard-coded POL Types

March 2022 Rialto

The Rialto Administrator can now control what PO line type is created automatically by Rialto orders, in order to align with institutional policies and Analytics support.

Today, Rialto creates orders of type "Electronic Book - One Time" and "Print Book - One Time" for all orders based on their material types. Some institutions use alternative POL types (typically "Electronic Title - One Time" and "Physical - One Time", because they provide more flexibility in accommodating non-book materials). When the POL types are disabled, now the customer-defined default order line types are used instead.

See [Enabling/Disabling PO Line Types](#).

Gale eBooks Available in the Rialto Marketplace for US & Canada

February 2022 Rialto

More than 15,000 ebooks from the Gale eBooks platform will be enabled for acquisition through the Rialto marketplace on February 7th, 2022, for libraries in the United States and Canada. This expansion of Rialto offerings is important now more than ever before, as librarians meet the demands from students and faculty for ebooks and other digital media for remote learning. Please contact Rialto customer support to enable the new platform, if you are unable to purchase.

Gale eBooks cover multidisciplinary subject areas that serve a broad range of needs for academic libraries. Acquiring these works directly through Rialto enables librarians to consolidate ordering and invoicing within a single system, saving time and steps.

Automatic Enabling of Features

February 2022 Rialto

Several new features that previously required assistance from Rialto support to activate are now active by default for all Rialto accounts:

- **Sorting by Ranking** - Ranking profiles can now be used to sort offers in the same work (from search) and lists. See [Searching the Rialto Marketplace](#) and [Working with Lists](#).
- **Notifications** - To help staff stay informed, users can now opt into receiving Rialto specific notifications. Notifications display in a new panel accessed from the main navigation. Users have the option to receive pop-up notifications, and/or email messages for all available notification types. See [User Notifications in Rialto](#) for notifications, and [Configuring Letters](#) for the email configuration.

Online Help Enabled for All Rialto Pages

February 2022 Rialto

Online help is now available for all Rialto pages.

To open online help, select the

icon on the main toolbar, and then select one of the below options:

- **Help for This Page** - To open the help page specifically for the Rialto page you have open.
- **Browse Online Help** - To browse online help for all Ex Libris Products.

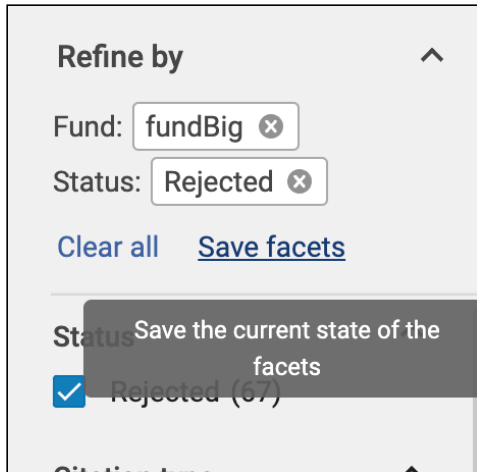

For details, see [The Alma User Interface](#).

Saving Facets on the Order History Page

February 2022 Rialto

Now users can save applied facets in the Facets panel on the Order History page so that preferred facets are applied on page load of future sessions. This reduces time and clicks when viewing the page.

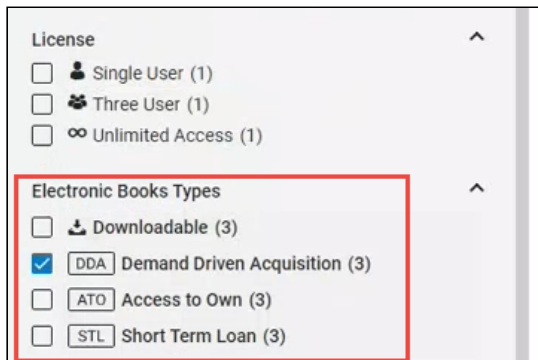

See [Saving Selected Facets for Future Sessions.](#)

DDA/STL/ATO Facets

February 2022 Rialto

Facets for DDA, ATO and STL Acquisition models were added under Electronic Books Types, so that Selectors can readily locate the type of content they want to purchase.

This will appear in facet panels where offers with these are returned for Search, Feeds, Lists, Selection Plans, DDA pool, and EBA pools.

Additional Information for Cart Confirmation Lines

February 2022 Rialto

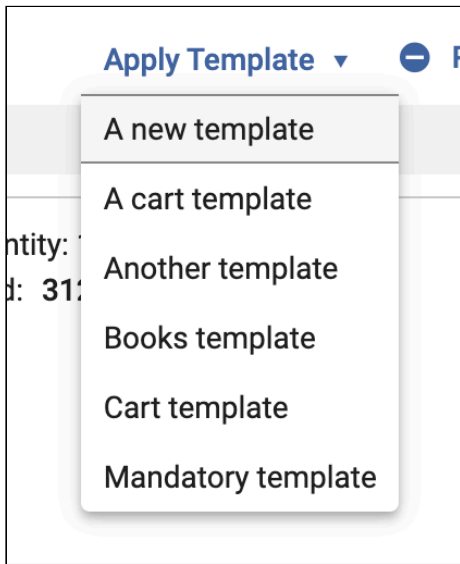

Purchasers can now see the an overwritten call number on offer lines in the Cart Approval screen on the new Cart and Orders Awaiting Approval Task List so that they can confirm cart value applications at glance, without having to navigate away from checkout.

Templates Sorted in Alphabetical Order

February 2022 Rialto

Now the list of cart templates is sorted alphabetically to enable customers with a large number of templates finding the right template quickly.

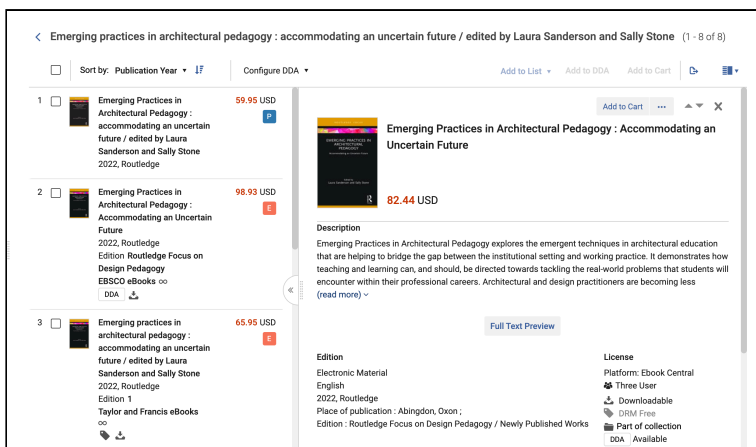

See [Cart Template Management](#).

Saved Page Display Preference

February 2022 Rialto

Now when viewing listed offers, your display preference is saved per page (Search, Lists, Order History, etc.) after adjusting the panel divider between listed offers and offer details. Future page visits will default to your adjustments per page.

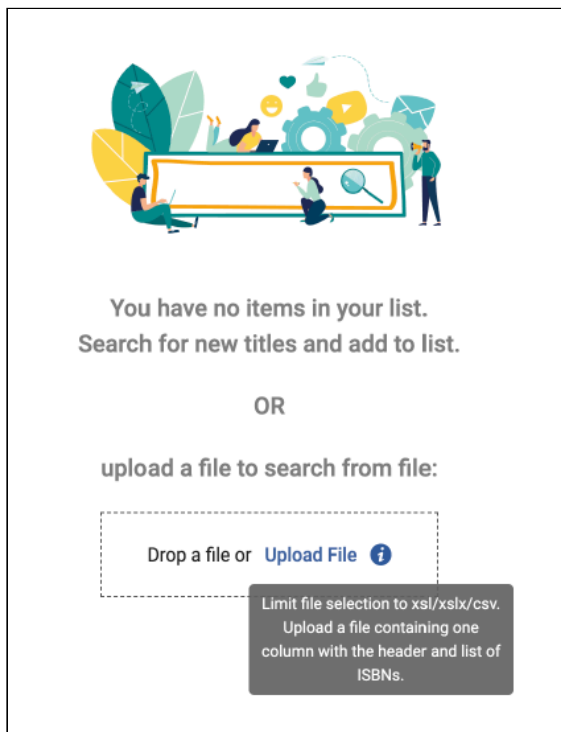

See [Rialto Page Views](#).

Bulk Upload Enhancements

February 2022 Rialto

Improvements were made to the bulk upload workflow:

- A tooltip now indicates the required file type and structure:

- Increased maximum size for file upload, from 70 KB to 30 MB
 - an upload progress bar will display for smaller files under 13 KB.
 - a banner will display on the page for files larger than 13 KB.
 - When uploading files with a large amount of ISBNs, the upload is done by job that runs in the background to prevent timeouts and allow you to continue working with Rialto while the file loads.
- Pop-up notifications for:
 - Upload completed successfully.
 - Upload failed (file too large or wrong format/file type).
 - Upload aborted (this will appear given Support had to intervene and cancel a large file upload).

See [Bulk Search from Uploaded File](#).

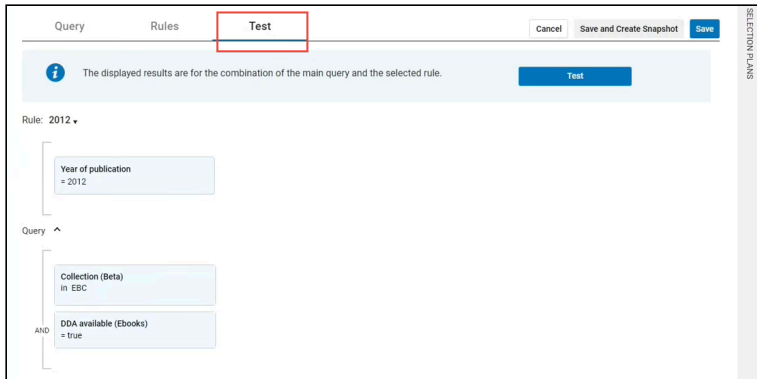

Selection Plan - Testing Tab Added

February 2022 Rialto

The **Test** tab, added to the Selection Plan configuration page, allows for individual testing of plan rules to ensure each rule is well-formed. This new action enables testing a Selection Plan base query in conjunction with the ranking profile and a rule, in order to make sure that the combination retrieves the desired results.

Note

This test runs only against one selected rule, meaning that it does not exclude results from any preceding rules. For a holistic rules results display, create a Snapshot.

Testing displays the matching results for the current rule + the base query on the results panel that opens when you select **Test**.

See [Selection Plan Management](#).

Selection Plan - Default Rule Modified

February 2022 Rialto

The default rule available for Selection Plans was changed to "[Available X weeks ago] [less than or equal to] [52]". This provides a better experience for users by reducing clicks and eliminating redundancy for E-only users.

Enhanced Display for Listed Offers

January 2022 Rialto

The Offers list was enhanced to display existing information in a clearer way, allowing for improved scanability when evaluating many listed offers.

	The Invention of Jane Harrison by Beard, Mary 2000, Harvard University Press Edition Revealing Antiquity;	Ebook Central ∞ 9780674269088 E  
	The Invention of Jane Harrison by Beard, Mary 2000, Harvard University Press Edition Revealing Antiquity;	Ebook Central  9780674269088 E 
	The Invention of Jane Harrison by Beard, Mary 2000, Harvard University Press Edition Revealing Antiquity;	Ebook Central  9780674269088 E 
	The invention of Jane Harrison by Beard, Mary 2000, Harvard University Press	Cloth/HB 9780674002128 P 

Fields that were modified:

- Icons now appear for Electronic and Physical items instead of the actual words.
- Icons appear for ATO- and STL-eligible items.
- Icon appears for items included in a collection.

Additional Information in Offer Details

January 2022 Rialto

Now Offer Details display additional metadata when provided by the publisher. Elements on the page were rearranged to enhance readability.

New fields that were added:

- "DRM free", "DDA", "ATO", and "STL" all display as "Available" or "Not Available" for enhanced eligibility.
- "Part of a series" and the series name
- "Publication date"
- "Added to Rialto" - the date the title was added to the marketplace

"In Oasis plan" Badge Renamed to "In ProQuest Plan"

January 2022 Rialto

The "In Oasis Plan" badge was renamed to

"In ProQuest plan", so that it can apply to all libraries with existing ProQuest standing orders.

See [List of Rialto Badges](#).

"Purchased in Rialto" Badge Removed from Work Search Results

January 2022 Rialto

The "Purchased in Rialto" badge was removed from the work search results because it was doubled with the "In Your Institution" badge and added visual noise to the page. The badge continues to display for offers.

See [List of Rialto Badges](#).

"Sent to Approval Date" Added to Order History Page

January 2022 Rialto

In the **Order History** page, the date on which the item was sent to approval is now displayed with the date with the date it was ordered.

Note that if another user performed the action (not you), the user card with the user's name is displayed alongside the date.

Orders Awaiting Approval Enhancements

Search Added

January 2022 Rialto

Now you can search the Order Approval page by ISBN and title. This allows the Approver to get to the desired order quickly and without paginating the list.

"Date Added" Displayed on Offers

January 2022 Rialto

Now the date on which an order was submitted for approval is displayed on the Orders Awaiting Approval page. This allows you to determine at a glance the offers you should take action on by recency.

"Reject and Move to List" Option Added

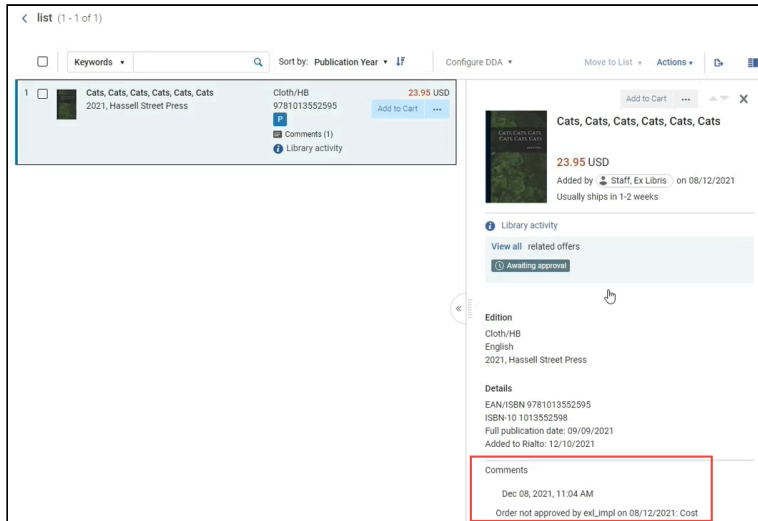

January 2022 Rialto

Now Approvers can remove offers from the Orders Awaiting Approval page by rejecting and adding to a list through the new action "Reject and move to list." This means that Approvers do not need to navigate away from the page to continue their workflow, and Selectors are aware offers are not going to be purchased directly.

When rejecting and adding to a list, the Approver now receives the confirmation popup to select a reject reason. This reject

reason carries forward as a comment on the item that is now included in the list. The default text in comment is "Order rejected by [user] on [date]: [reject reason]". The Approver can edit this comment as needed.

Note

This option replaces the "Move to list" option.

See [Rejecting Offers](#).

"Add to Selector Cart" Renamed "Add to Order List"

January 2022 Rialto

The action "Add to Selector Cart" on the Orders Awaiting Approval page was renamed "Add to Order List". The confirmation text for this action was rephrased from "Item added to selector cart" to "Item added to order list". This is to reflect the fact that this action adds a new order owned by the Approver.

See [Replacing Offer with Another Offer](#).
