

Spring4Shell vulnerability in the Spring Framework

- **Product:** Rosetta
 - **Product Version:** 7.2
-

Question

Is Rosetta affected by Spring4Shell vulnerability in the Spring Framework?

Answer

CVE-2022-22965 – Rosetta is not vulnerable since it doesn't use Spring MVC.

The vulnerable jar can be removed from Rosetta version 7.2 and below application servers:

```
rm /exlibris/dps/d4_1/system.dir/thirdparty/tomcat/lib/spring-webmvc.jar
```

CVE-2022-22963 - Rosetta is not vulnerable since it doesn't use the Spring Cloud Function.
